Climate Change 2021 - The Physical Science Basis Intergovernmental Panel on Climate Change (IPCC), 2023-07-26
The Working Group I contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the physical science basis of climate change. It considers in situ and remote observations, paleoclimate information, understanding of climate drivers and physical, chemical and biological processes and feedbacks, global and regional climate modelling, advances in methods of analyses and insights from climate services. It assesses the current state of the climate, human influence on climate in all regions, future climate change including sea level rise, global warming effects including extremes, climate information for risk assessment and regional adaptation, limiting climate change by reaching net zero carbon dioxide emissions and reducing other greenhouse gas emissions and benefits for air quality. The report serves policymakers, decision makers, stakeholders and all interested parties with the latest policy relevant information on climate change. The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice. Considerable investments are now being made into the development of green technology, renewable energy, biodiversity conservation, resource efficiency, recycling of materials and green infrastructure. This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics. The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular

focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy

Observational Assessments of Glacier Mass Changes at Regional and Global Level Michael Zemp, Matthias Holger Braun, Fanny Brun, Laura Thomson, 2021-03-26

Fire and Ice Jonathan Mingle, 2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick homes has survived and thrived in one of the world s most challenging settings for a thousand years But now its people confront an existential threat chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry Fire and Ice weaves together the story of Kumik s inspiring response to this calamity with the story of black carbon Black carbon from inefficient fires the particulate residue that makes soot dark is the second largest contributor to global warming after carbon dioxide It s also a key ingredient of the air pollution that public health experts regard as humanity s greatest environmental health risk worldwide soot laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon s dark fingerprints outward from Kumik and around the world Mingle investigates its impacts on snow ice and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi Combining cultural history detailed reportage climate and energy science and dramatic storytelling Fire and Ice is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity Can Kumik s people come together to reinvent fire harness what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves Can the rest of us rise to the same challenge Fire and Ice connects these questions with the work of enterprising scientists engineers entrepreneurs and activists around the world in a narrative that combines mythology reason humor persistence and hope in a race against a global clock

Carbon Governance, Climate Change and Business Transformation Adam Bumpus, James Tansey, Blas Luis Pérez Henríquez, Chukwumerije Okereke, 2014-07-17 Transformation to a low carbon economy is a central tenet to any

discussion on the solutions to the complex challenges of climate change and energy security Despite advances in policy carbon management and continuing development of clean technology fundamental business transformation has not occurred because of multiple political economic social and organisational issues Carbon Governance Climate Change and Business Transformation is based on leading academic and industry input and three international workshops focused on low carbon transformation in leading climate policy jurisdictions Canada USA and the UK under the international Carbon Governance Project CGP banner The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change the conditions under which business transformation can genuinely take place and key policy and business innovations needed Broadly the book is based on emerging theories of multi levelled multi actor carbon governance and applies these ideas to the real world implications for tackling climate change through business transformation Conceptually and empirically this book stimulates both academic discussion and practical business models for low carbon transformation

Science and the Global Environment Alan McIntosh, Jennifer Pontius, 2016-09-03 Case Studies for Integrating Science and the Global Environment is designed to help students of the environment and natural resources make the connections between their training in science and math and today's complex environmental issues The book provides an opportunity for students to apply important skills knowledge and analytical tools to understand evaluate and propose solutions to today's critical environmental issues The heart of the book includes four major content areas water resources the atmosphere and air quality ecosystem alteration and global resources and human needs Each of these sections features in depth case studies covering a range of issues for each resource offering rich opportunities to teach how various scientific disciplines help inform the issue at hand Case studies provide readers with experience in interpreting real data sets and considering alternate explanations for trends shown by the data This book helps prepare students for careers that require collaboration with stakeholders and co workers from various disciplines Includes global case studies using real data sets that allow readers to practice interpreting data and evaluating alternative explanations Focuses on critical skills and knowledge encouraging readers to apply science and math to real world problems Employs a system based approach linking air water and land resources to help readers understand that cause effect may be complex and solutions to environmental problems require multiple perspectives Includes special features such as links to video clips of scientists at work boxed information a solutions section at the end of each case study and practice exercises

Methods of Critical Discourse Studies Ruth Wodak, Michael Meyer, 2015-10-15 This is a sophisticated and nuanced introduction to critical discourse analysis CDA that covers a range of topics in an accessible engaging style With international examples and an interdisciplinary approach readers gain a rich understanding of the many angles into critical discourse analysis the fundamentals of how analysis works and examples from written texts online data and images This new edition expands

coverage of multimodality adds two new chapters on social media and analysis of online data supports learning with a guided introduction to each chapter includes a new and extended glossary Clearly written practical and rigorous in its approach this book is the ideal companion when embarking on research that focuses on discourse and meaning making Sustainability Assessments of Buildings Umberto Berardi,2018-07-06 This book is a printed edition of the Special Issue Sustainability Assessments of Buildings that was published in Sustainability Federal Register ,2012-09 **Social Justice and Transformative Learning** Saundra M. Tomlinson-Clarke,Darren L. Clarke,2016-03-10 The similarities between the United States and South Africa with respect to race power oppression and economic inequities are striking and a better understanding of these parallels can provide educational gains for students and educators in both countries Through shared experiences and perspectives this volume presents scholarly work from U S and South African scholars that advance educational practice in support of social justice and transformative learning It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal national and global identity China's Way to Carbon Emissions Reduction Ying Shen,2015-08-18 Now that the most recent scientific estimates have shown that China has become the world s largest source of greenhouse gas emissions China s influence on the world s environment and sustainable development highlights the importance of tailoring Chinese climate change law to conform with the requirements of international conventions and agreements on climate change This thorough analysis based on an examination of climate status legal background and current regulatory systems in China examines the potential role of different policy instruments in reducing carbon emissions in order to find an appropriate choice for China and recommends approaches to key issues for relevant authorities The author conducts a comprehensive and in depth study on the three mainstream environmental policy instruments used to control carbon emissions the cap and trade system the carbon tax and command and control regulations in a Chinese context She reviews China s current policies and elucidates how the issues of climate change and global warming call for social environmental economic and legal reforms in China especially in the areas of administrative law and property rights law Among the issues and topics covered are the following key issues on designing and implementing each of the three policy instruments the choice of regulatory instruments for carbon emissions reduction in a socialist market economy based on the discussion of market failure and government failure theories legal challenges from China s current administrative legislation and the definition of carbon emissions entitlements practical effect of China s climate change policy at the national provincial and local levels effectiveness of China s implementation of its international obligations lessons learned from schemes implemented in the United States and Australia comparison of China s seven regional pilot emissions trading scheme ETS programmes with the well established EU ETS linkage between China s ETS and other ETSs from a global perspective and future direction of an emerging carbon market in China The analysis assesses the critical costs and benefits of each approach

in the context of selected case studies taking legal literature in the field fully into account Given that the Chinese government is taking steps to reduce emissions by altering energy production and usage and is signalling a willingness to make similar commitments in a multilateral treaty it is very timely and important for lawmakers and scholars within and outside China to think about new and appropriate regulatory measures to respond to the crisis and plan for a sustainable future This study provides not only a useful benchmark for both China and other countries in formulating initiatives on enhancing climate protection but also details the global implications for governments and for international organizations concerned with the understanding between China and the rest of the world in the context of climate change mitigation

Research Handbook on Climate Governance Karin Bäckstrand, Eva Lövbrand, 2015-11-27 The 2009 United Nations climate conference in Copenhagen is often represented as a watershed in global climate politics when the diplomatic efforts to negotiate a successor agreement to the Kyoto Protocol failed and was replaced by a fragmented and decentralized climate governance order In the post Copenhagen landscape the top down universal approach to climate governance has gradually given way to a more complex hybrid and dispersed political landscape involving multiple actors arenas and sites The Handbook contains contributions from more than 50 internationally leading scholars and explores the latest trends and theoretical developments of the climate governance scholarship

Stranded Assets and the Environment Ben Caldecott, 2018-05-11 Drawing on the work of leading researchers and practitioners from a range of disciplines including economic geography economics economic history finance law and public policy this edited collection provides a comprehensive assessment of stranded assets and the environment covering the fundamental issues and debates including climate change and societal responses to environmental change as well as its origins and theoretical basis The volume provides much needed clarity as the discourse on stranded assets gathers further momentum In addition to drawing on scholarly contributions there are chapters from practitioners and analysts to provide a range of critical perspectives While chapters have been written as important standalone contributions the book is intended to systematically take the reader through the key dimensions of stranded assets as a topic of research inquiry and practice The work adopts a broad based social science perspective for setting out what stranded assets are why they are relevant and how they might inform the decision making of firms investors policymakers and regulators The topic of stranded assets is inherently multi disciplinary cross sectoral and multi jurisdictional and the volume reflects this diversity This book will be of great relevance to scholars practitioners and policymakers with an interest in include economics business and development studies climate policy and environmental studies in general
