Critical Appraisal of Physical Science as a Human Enterprise Mansoor Niaz, 2009-02-07 It is generally believed that doing science means accumulating empirical data with no or little reference to the interpretation of the data based on the scientist s theoretical framework or presuppositions Holton 1969a has deplored the widely accepted myth of experimenticism according to which progress in science is presented as the inexorable result of the pursuit of logically sound conclusions from unambiguous experimental data Surprisingly some of the leading scientists themselves Millikan is a good example have contributed to perpetuate the myth with respect to modern science being essentially empirical that is carefully tested experimental facts free of a priori conceptions leading to inductive generalizations Based on the existing knowledge in a field of research a scientist formulates the guiding assumptions Laudan et al 1988 presuppositions Holton 1978 1998 and hard core Lakatos 1970 of the research program that constitutes the imperative of presuppositions which is not abandoned in the face of anomalous data Laudan and his group consider the following paraphrase of Kant by Lakatos as an important guideline philosophy of science without history of science is empty Starting in the 1960s this historical school has attempted to redraw and replace the positivist or logical empiricist image of science that dominated for the first half of the twentieth century Among other aspects one that looms large in these studies is that of guiding assumptions and has considerable implications for the main thesis of this monograph Chapter 2 **Take 5! for Science** Kaye Hagler, Judy Elgin Jensen, 2015 Take Five for Science transforms those first five minutes of class into engaging writing opportunities Students will brainstorm their way through 75 topics within three main science divisions earth life and physical science All prompts are aligned with NGSS and

ELA CCSS as students debate compare investigate question and design in response to 150 prompts Whether your students are working to save endangered ecosystems investigating distant constellations creating unusual animals or constructing a design solution these diverse and creative prompts will have students looking forward to each day when they re asked to Take Five for Science Begin every day of the school year with a burst of writing in the science discipline with this comprehensive and fun resource Ready Set Take Five
