Baccalaureate Great Britain: Parliament: House of Commons: Education Committee,2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public something which didn't happen with the English Baccalaureate EBac The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac They want the Government to deliver on its promise in the White Paper The Importance of Teaching to use performance tables to put greater emphasis on the progress of every child The report notes that certain academic subjects studied at A level are more valued by Russell Group universities than others but argues that a focus on a fairly narrow range of subjects demanding considerable curriculum time is likely to have negative consequences on the uptake of other subjects The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac's composition when the National Curriculum Review is concluded The Government should confirm how it will monitor the attainment of children on free school meals in the EBac The report also calls for further international evidence to inform debate on the merits of the EBac evidence the inquiry received did not suggest a link in other countries between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students Elsewhere the report argues that the current arrangements for certification of the EBac should be shelved as should calls for a Technical Baccalaureate to sit alongside the existing award

Lewis, Jörg Liesen, Steve Russ, 2010-12-16 On the occasion of the 200th anniversary of the birth of Hermann Graßmann 1809-1877 an interdisciplinary conference was held in Potsdam Germany and in Graßmann's hometown Szczecin Poland. The idea of the conference was to present a multi-faceted picture of Graßmann and to uncover the complexity of the factors that were responsible for his creativity. The conference demonstrated not only the very influential reception of his work at the turn of the 20th century but also the unexpected modernity of his ideas and their continuing development in the 21st century. This book contains 37 papers presented at the conference. They investigate the significance of Graßmann's work for philosophical as well as for scientific and methodological questions for comparative philology in general and for Indology in particular for psychology, physiology, religious studies, musicology, didactics and last but not least mathematics. In addition the book contains numerous illustrations and English translations of original sources which are published here for the first time. These include life histories of Graßmann written by his son Justus and of his brother Robert written by Robert himself as well as the paper 'On the concept and extent of pure theory of number' by Justus Graßmann the father.
