The physical training that all Royal Marines recruits undergo is challenging and demanding yet also structured and achievable Here for the first time is an official manual to show you in detail how they succeed and how you can mirror all relevant aspects in your own fitness training Packed with facts and step by step instruction accompanied by hundreds of colour photographs Royal Marines Fitness contains a wealth of guidance for anyone wanting to achieve a higher level of fitness whether it s preparing for a marathon losing weight or putting on muscle mass This manual provides you with all the tools and information you need to put together a training programme specific to your own targets and to adapt it as you surpass your expectations *Decoding a Royal Marine Commando* Mark Burchell, 2018-10-25 With a heritage dating back to the mid seventeenth century the Royal Marines have accrued a rich history of rituals artefacts and material culture that is consciously deployed in order to define and shape the institution both historically and going forward into an uncertain future Drawing upon this heritage Mark Burchell offers a unique method of understanding how the Royal Marines draw upon this material culture in order to help transform ordinary labour power to political agency comprising acts of controlled and sustained violence He demonstrates how a barrage of objects and items including uniforms weapons landscapes architecture personal kit drills rituals and iconography are deployed in order successfully to integrate the recruits into the Royal Marines culture It is argued that this material culture is a vital tool with which to imprint the military s own image on new recruits as they embark on a process of de individualisation Having been granted unprecedented access to the Commando Training Centre at Lympstone as an anthropologist Burchell observed an intake of recruits throughout their demanding and

exhausting year long training programme The resulting book presents to the academic community for the first time a theorised in depth account of a relatively unexplored social community and how its material culture creates and reifies new military identities This path breaking interdisciplinary analysis provides fresh understanding of the multiple processes of military enculturation through a meticulous revision of the relationships that exist between disciplinary and punishment practices violence and masculinity narratives and personhood and will explore how these issues are understood by recruits through their practical application of body to physical labour and by the cues of their surrounding material culture
