Jean Baptiste de La Salle ,1873 **Quiet Classrooms, Educational Soundscapes, and the Power of Silence** Pieter Verstraete,2025-04-29 This highly novel book provides an exploration of the role of silence in the school setting and interrogates the value of silence and quiet in contemporary educational practices looking at pedagogies and classroom practice to guide this increasingly popular subdiscipline of the history of education Arguably the first contribution written in English on the educational value of silence within the history of education more broadly this book interrogates the way in which we encounter and label sounds and noises within the classroom and the ways in which these have come to dictate relationships between teachers and pupils in our contemporary society The chapters investigate sociocultural reasons for a Western problematization of silence and shyness of children and the wider impact on class participation and treatment The issues around children s sense of identity and teachers authority are explored in relation to silence as a powerful tool for a progressive understanding of learning Ultimately the book will guide thinking around educational acoustic surroundings and provide alternative vocabulary to talk about educational soundscapes and the real term impact on our learning environments Providing a novel and nuanced framework for studying schools as acoustic or sound spaces the book will be of interest to researchers scholars and academics in the fields of history of education curriculum studies and the theories of learning more broadly Translated by Emmeline Burdett on the basis of the original Dutch edition Leuven University Press 2022

The Sacred Network Chris H. Hardy,2011-02-23 How sacred sites amplify the energies of consciousness the earth and the universe Examines the web of geometrical patterns linking sacred sites worldwide with special focus on the sacred network of ley lines in Paris Unveils the coming state of shared consciousness for humanity fueled by the sacred network Reveals how consciousness is a tangible form of energy First marked by the standing stones of our megalithic ancestors the world s sacred sites are not only places of spiritual energy but also hubs of cosmic energy and earthly energy Generation upon generation has recognized the power of these sites with the result that each dominant culture builds their religious

structures on the same spots the Cathedral of Notre Dame in Paris for example was constructed over a Temple to Diana that in turn had been built over a stone pillar worshipped by the Gauls In The Sacred Network Chris Hardy shows how the world's sacred sites coincide with the intersections of energetic waves from the earth's geomagnetic field and how via their megaliths temples and steeples these sites act as antennae for the energies of the cosmos Delving deeply in to Paris's sacred network she also explores the intricate geometrical patterns created by the alignments of churches and monuments such as pentagrams and Stars of David Revealing that consciousness is a tangible energy she explains how the sacred network is fueling an 8 000 year evolutionary cycle initiated by our megalithic ancestors that will soon culminate in a new state of shared consciousness for humanity *The Adeodatus Handbook on Catholic Education and Culture: Volume 1* Alex E. Lessard, R. Jared Staudt, 2025-06-27 Catholic education stands in need of renewal for it too has experienced the consequences of the rupture of faith and reason in the modern period Secularism affects Catholic schools as well as public ones when faith remains confined solely to a religion class or the celebration of the Mass Our past provides a model of integration the unity of divine revelations and the liberal arts and a life of wisdom that pursues what is truly highest Modern people too often settle for less little comforts and distractions while the theologians philosophers and educators of the past spur us on to stop at nothing less than God's invitation to enter his divine life This first volume of the Adeodatus Handbook seeks to provide inspiration to return to the central vision of Catholic education an integrated approach to the liberal arts that flows from God's initiative toward us and is ordered toward eternal union with him The essays of this volume unfold the narrative offered in this introduction in more detail We consider them to be the most essential figures who have established the Catholic approach to education Two of them Plato and Aristotle were pagan authors who formed the philosophical basis of the Catholic approach The others flowing from the Incarnation of the Son of God appropriated the truths of nature contemplated by philosophy and drew them into a sacramental synthesis with the truths of divine revelation There can be no genuine Christian education that does help the student to contemplate the whole of reality and to live a life of wisdom rooted in the virtues that perfect human nature while ultimately receptive of the gifts and fruits of the Holy Spirit The majority of the figures addressed in this volume are canonized saints pointing us to the priority of holiness in Catholic education Education serves the ultimate aim of human life our perfect happiness in the beatific vision To reach this we need the support of mentors and friends This requires the concrete embodiment of Christian community within the home and school It can also however flow from our communion with the great sainted educators of our heritage We have inherited their legacy and with their prayers and support we have been tasked with continuing in our own age We will not be able to replicate their efforts but with the grace and inspiration of the Holy Spirit we can make our contribution in educating the youth young adults seminarians and lay people of the Church of God **Faith in Education** T.
