Sample Church Service Program:

Saving America? Robert Wuthnow, 2009-11-06 On January 29 2001 President George W Bush signed an executive order creating the White House Office of Faith Based and Community Initiatives This action marked a key step toward institutionalizing an idea that emerged in the mid 1990s under the Clinton administration the transfer of some social programs from government control to religious organizations However despite an increasingly vocal ideologically charged national debate a debate centered on such questions as What are these organizations doing How well are they doing it Should they be supported with tax dollars solid answers have been few In *Saving America* Robert Wuthnow provides a wealth of up to date information whose absence until now has hindered the pursuit of answers Assembling and analyzing new evidence from research he and others have conducted he reveals what social support faith based agencies are capable of providing Among the many questions he addresses Are congregations effective vehicles for providing broad based social programs or are they best at supporting their own members How many local congregations have formal programs to assist needy families How much money do such programs represent How many specialized faith based service agencies are there and which are most effective Are religious organizations promoting trust love and compassion The answers that emerge demonstrate that American religion is helping needy families and that it is more broadly fostering civil society Yet religion alone cannot save America from the broad problems it faces in providing social services to those who need them most Elegantly written *Saving America* represents an authoritative and evenhanded benchmark of information for the current and the coming debate

Music in World War II Pamela M. Potter,Christina L. Baade,Roberta Montemorra Marvin,2020-10-06 A collection of essays examining the roles played by music in American and European society during the Second World War Global conflicts of the twentieth century fundamentally transformed not only national boundaries power relations and global economies but also the arts and culture of every nation involved An important unacknowledged aspect of these conflicts is that they have unique musical soundtracks Music in World War II explores how music and sound took on radically different dimensions in the United States and Europe before during and after World War II Additionally the collection examines the impact of radio and film as the disseminators of the war s musical soundtrack Contributors contend that the European and American soundtrack of World War II was largely one of escapism rather than the lofty solemn heroic and celebratory mode of war music in the past Furthermore they explore the variety of experiences of populations forced from their homes and interned in civilian and POW camps in Europe and the United States examining how music in these environments played a crucial role in maintaining ties to an idealized home and constructing politicized notions of national and ethnic identity This fascinating well constructed volume of essays builds understanding of the role and importance of music during periods of conflict and highlights the unique aspects of music during World War II A collection that offers deeply informed interdisciplinary and original views on a myriad of musical practices in Europe Great Britain and the United States during the period Gayle Magee co editor of *Over Here Over There Transatlantic Conversations on the Music of World War I*
