Novel insights in rehabilitation of neglect, 2nd Edition Stefan Van Der Stigchel,Tanja Nijboer,2015-01-09 Hemispatial neglect is the failure to report respond to or orient to novel or meaningful stimuli presented in the contralesional visual field It constitutes one of the most invalidating neurological disorders that can occur after stroke It is therefore important to treat neglect as adequate as possible and much of the research dedicated to neglect therefore focuses on rehabilitation In this special topic you will find 29 articles on the rehabilitation of neglect This Research Topic has opened new perspectives and has given us an indication of where the field is going Although some of the current rehabilitation techniques have proven to be beneficial there is limited agreement on the most valuable technique or the mechanisms underlying the ameliorating effects

The ventricular-subventricular zone: a source of oligodendrocytes in the adult brain Oscar Gonzalez-Perez,Jose Manuel Garcia-Verdugo,Adan Aguirre,2014-09-30 Demyelinating diseases are characterized by an extensive loss of oligodendrocytes and myelin sheaths from axolemma which commonly result in disability in young adults To date there is no effective treatment against these neurological disorders In the adult brain there are neural stem cells NSCs that reside within a niche denominated ventricular subventricular zone V SVZ in the lateral wall of the cerebral ventricles NSCs give rise to neurons and oligodendrocytes that

help preserve cellular homeostasis Growing evidence indicates that V SVZ progenitor cells may represent an endogenous source of oligodendrocytes that can be useful to treat demyelinating diseases This e Book The ventricular subventricular zone as a source of oligodendrocytes in the adult brain collected the most recent evidence regarding the mechanisms that modulate the proliferation migration quiescence cell fate choices and survival of oligodendrocyte precursors generated in the V SVZ Herein we compiled information about the role of Sonic hedgehog NMDA receptors ErbB proteins hemopressin erythropoietin osmolarity and microglia in the oligodendrocyte production Some chapters also describe the role of oligodendrocyte precursors in the preservation of cellular homeostasis aging and white matter repair All these information is presented as novel research findings short communications and review articles which were written by experts in the field of oligodendrocyte generation myelin production and white matter re myelination [House of Commons - Public Administration Select Committee: Trith to Power: How Civil Service Reform Can Succeed - HC 74](#) Great Britain: Parliament: House of Commons: Public Administration Select Committee,2013-09-06 The Public Administration Select Committee PASC has concluded a year long inquiry into the future of the Civil Service with only one recommendation that Parliament should establish a Joint Committee of both Houses to sit as a Commission on the future of the Civil Service It should be constituted within the next few months and report before the end of the Parliament with a comprehensive change programme for Whitehall with a timetable to be implemented over the lifetime of the next Parliament The Report considers the increased tensions between ministers and officials which have become widely reported and places the problems in Whitehall in a wider context of a Civil Service built on the Northcote Trevelyan settlement established in 1853 and the Haldane principles of ministerial accountability set out in 1919 The government s Civil Service Reform Plan lacks strategic coherence and clear leadership from a united team of ministers and officials The Northcote Trevelyan Civil Service remains the most effective way of supporting the democratically elected Government and future administrations in the UK Divided leadership and confused accountabilities in Whitehall have led to problems a low level of engagement amongst civil servants in some departments and agencies and a general lack of trust and openness the Civil Service exhibits the key characteristics of a failing organisation with the leadership are in denial about the scale of the challenge they face There is a persistent lack of key skills and capabilities across Whitehall and an unacceptably high level of churn of lead officials which is incompatible with good government *The Qualified Student* Harold S. Wechsler,2014-09-15 In *The Qualified Student* Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between

social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions
