Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-21

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. The *Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Multilingual Education Yearbook 2021 Anthony A. Essien, Audrey Msimanga, 2021-05-04. This edited book attempts to foreground how challenges and complexities between policy and practice intertwine in the teaching and learning of the STEM subjects in multilingual settings and how they policy and practice impact on educational processes, developments and outcomes. The unique feature of this book thus lies in its combination of not just language issues in the teaching and learning of the STEM subjects but also in how these issues relate to policy and practice in multilingual contexts and how STEM research and practice may inform and shape language policies and their implementation in multilingual contexts. This book is of interest to stakeholders involved in STEM education such as researchers, undergraduate and graduate students, tertiary level teachers, teacher educators, curriculum developers as well as other professionals with responsibilities in STEM education subjects. The book is written in a way that is accessible to a wide range of backgrounds including those who are in language education.

Quality education Muchativugwa L. Hove, Martha Matashu, 2021-11-30. This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project and articulate the larger phenomenon of human rights violations in Africa and how in turn the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact

and interpret quality education The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces This book is essential reading for scholars seeking a solid grounding in exploring quality education the instances of epistemic disobedience the political implications of place and power and human rights in theory and practice Social Justice and Education in the 21st Century Willie Pearson Jr.,Vijay Reddy,2021-04-10

The world is not an equal place There are high and low income countries and high and low income households For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities This pattern often reproduces the privileges and inequalities of groups in a society This book explores this differentiation in education from a social justice lens Comparing the United States and South Africa this book analyzes each country s developmental thinking on education from human capital and human rights approaches in both primary and higher education The enclosed contributions draw from different disciplines including legal studies sociology psychology computer science and public policy *Collaborative community partnerships across education settings* Mariëtte P.

Koen,Luiza O. De Souza,2025-02-25 This book features chapters by scholars from various education fields specialising in sustainability As the first volume in North West University s Community based Educational Research Series it focuses on transforming education through a participatory approach The authors explore quality education across early childhood primary secondary and higher education by examining collaborative efforts among practitioners parents and teachers This scholarly book provides empirical evidence on how collaborative initiatives can promote sustainable development These initiatives encourage partnerships among community leaders educators learners nongovernmental organisations government and the private sector for lifelong learning and professional development It highlights southern African experiences in collaborative education aligned with the United Nations sustainable development goal of achieving quality education The book demonstrates various research designs and methods applied to educational practice from early childhood to tertiary levels through empirical research and community projects Using Multimodal Representations to Support Learning in the

Science Classroom Brian Hand,Mark McDermott,Vaughan Prain,2015-11-06 This book provides an international perspective of current work aimed at both clarifying the theoretical foundations for the use of multimodal representations as a part of effective science education pedagogy and the pragmatic application of research findings to actual classroom settings Intended for a wide ranging audience from science education faculty members and researchers to classroom teachers school administrators and curriculum developers the studies reported in this book can inform best practices in K 12 classrooms of all science disciplines and provide models of how to improve science literacy for all students Specific descriptions of classroom activities aimed at helping infuses the use of multimodal representations in classrooms are combined with discussion of the impact on student learning Overarching findings from a synthesis of the various studies are presented to help assert appropriate pedagogical and instructional implications as well as to suggest further avenues of research **The**

Pennell, Larry J. Garside, 2015-06-12 Scientific analyses of the geology, metallogeny, and mineralization of gold, silver, and other high value elements in the western U.S. Technical details on working mines, exploration results, new deposits. Presentations produced with the United States Geological Survey Society of Economic Geologists. Two volume book set printed in full color with full text searchable CD-ROM. Produced under the auspices of the Geological Society of Nevada and published every five years, this two volume book of peer reviewed papers focuses on the geological analysis of ore rich deposits in the western United States, especially ones containing gold and other high value elements. Hundreds of stratigraphic, lithographic, remote sensing, and core sample examples are presented, particularly of areas likely to host Carlin type gold deposits. The two volumes contain a wealth of data on specifically named mines as well as technical information on high potential areas for exploration. The book is profusely illustrated with full color maps, photographs, and charts for geology and mining engineering. A searchable CD accompanies the book and includes the full text of papers from the printed book as well as abstracts and information from poster sessions not found in the printed book. Chapters in the text are fully refereed versions of presentations originally delivered at a symposium supported by the Geological Society of Nevada along with the United States Geological Survey Society of Economic Geologists and the Nevada Bureau of Mines. Sample key words: metallogeny, gold, epithermal ore, magmatism, Carlin trend, square array, void mapping, SAVM, porphyry, copper, tungsten, orogeny, litho-geochemistry, 3-D resistivity, and modeling, fault surface mapping, airborne electromagnetics, and more. The CD-ROM displays figures and illustrations in articles in full color along with a title screen and main menu screen. Each user can link to all papers from the Table of Contents and Author Index and also link to papers and front matter by using the global bookmarks which allow navigation of the entire CD-ROM from every article. Search features on the CD-ROM can be by full text including all key words, article title, author name, and session title. The CD-ROM has an Autorun feature for Windows 2000 or higher products and can also be used with Macintosh computers. The CD includes the program for Adobe Acrobat Reader with Search 11.0.
