

3. TRUE or FALSE: Write the word "TRUE" if the statement is true. If the statement is false write the word that replaces the underlined word to make the statement true.

<u>Independent</u>	The <u>Dependent</u> Variable is the variable "I" change (investigator changes).
<u>TRUE</u>	You are <u>only</u> allowed to change <u>ONE</u> thing during an experiment.
<u>Extensive</u>	Theories are based on <u>limited</u> knowledge and observations.
<u>TRUE</u>	Scientific knowledge changes every day when new <u>observations</u> are made.
<u>Control</u>	A <u>constant</u> is the standard used for comparison observations in an experiment.
<u>TRUE</u>	A method for making any object or tool is considered a type of <u>technology</u> .

4. I wanted to see if the composition of a baking sheet had an effect on the amount of time it took to bake cookies. I made the cookie dough using the same amount of ingredients and mixed both for the same amount of time. I used a "cookie scooper" to measure out the dough so that each cookie was the same size. Tray #1 was made from Aluminum and Tray #2 was made from Teflon. For tray # 1, I used the Whirlpool model 457 oven and baked the cookies at 350 °F. For tray #2 I used the Whirlpool model 457 oven and baked the cookies at 400 °F. I used the same timer for both trays to measure how long it took to finish.

Explain where did I go wrong? Use ALL of the following words:

independent variable, dependent variable, fair test, constant, control. (Write in complete sentences)

This experiment was not a FAIR TEST. The original INDEPENDENT VARIABLE was to see how a change in the amount of time would affect the DEPENDENT VARIABLE (Finishing time of baked cookies). This means the time in the oven should have been the only variable to change, but the experimenter also changed the type of tray, and the oven temperature. Both trays should have remained CONSTANT along with the size of the cookies, the oven used, the temperature, and ingredients.

A better test would have been to see how the oven temperature affected the finishing time of the cookies. The experimenter would have kept everything constant except the oven temperature and used the cookie recipe's suggested temperature as the CONTROL.

5. Match the uses for each of the following pieces of lab equipment to its name:

<u>C</u>	Graduated Cylinder
<u>B</u>	Erlenmeyer Flask
<u>A</u>	Beaker

- A. Used to hold/heat/mix lab specimens (liquid or solid); NOT used to measure precise quantities

B. Holds and heats lab specimens; mixing done through swirling

C. Used to measure precise quantities of liquid

Physical Science Final Exam Answer Key

L Towner

Physical Science Final Exam Answer Key:

When people should go to the ebook stores, search commencement by shop, shelf by shelf, it is truly problematic. This is why we present the ebook compilations in this website. It will very ease you to see guide **Physical Science Final Exam Answer Key** as you such as.

By searching the title, publisher, or authors of guide you truly want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you goal to download and install the Physical Science Final Exam Answer Key, it is entirely simple then, previously currently we extend the join to purchase and make bargains to download and install Physical Science Final Exam Answer Key as a result simple!
