Global Health 101 Skolnik,2016 Rated by an independent panel as the best introductory Global Health text for undergraduates Global Health 101 Third Edition is a clear concise and user friendly introduction to the most critical issues in global health It illustrates key themes with an extensive set of case studies examples and the latest evidence Particular attention is given to the health development link to developing countries and to the health needs of poor and disadvantaged people The Third Edition is a thorough revision that offers an extensive amount of new and updated information while maintaining clarity simplicity and ease of use for faculty and students Offering the latest data on the burden of disease the book presents unique content on key topics that are often insufficiently covered in introductory materials such as immunization and adolescent health **The Growing Gap in Life Expectancy by Income** National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and Their Applications,Division of Behavioral and Social Sciences and Education,Committee on Population,Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population--Phase II,2015-09-17 The U S population is aging Social Security projections suggest that between 2013 and 2050 the population aged 65 and over will almost double from 45 million to 86 million One key driver of population aging is ongoing increases in life expectancy Average U S life expectancy was 67 years for males and 73 years for females five decades ago the averages are now 76 and 81 respectively It has long been the case that better educated higher income people enjoy longer life expectancies than less educated lower income people The causes include early life conditions behavioral factors such as nutrition exercise and smoking behaviors stress and access to health care services all of which can vary across education and income Our major entitlement programs Medicare Medicaid Social Security and Supplemental Security Income have come to deliver disproportionately larger lifetime benefits to higher income people because on average they are increasingly collecting those benefits over more years than others This report studies the impact the growing gap in life expectancy has on the present value of lifetime benefits that people with higher or lower earnings will receive from major entitlement programs The analysis presented in *The Growing Gap in Life Expectancy by Income* goes beyond an examination of the existing literature by providing the first comprehensive estimates of how lifetime benefits are affected by the changing distribution of life expectancy The report also explores from a lifetime benefit

perspective how the growing gap in longevity affects traditional policy analyses of reforms to the nation's leading entitlement programs This in depth analysis of the economic impacts of the longevity gap will inform debate and assist decision makers economists and researchers

State and Trends of Carbon Pricing 2014 World Bank World Bank,2014-05-28 The report is a one stop shop for learning about key developments and prospects of existing and emerging carbon initiatives A challenging international carbon market has not stopped the development of domestic carbon pricing initiatives Today about 40 national and over 20 sub national jurisdictions responsible for almost one fourth of global greenhouse gas emissions are putting a price on carbon Together these initiatives cover the equivalent of almost 6 gigatons of carbon dioxide or about 12% of global emissions

The Mathematical-Function Computation Handbook Nelson H.F. Beebe,2017-08-20 This highly comprehensive handbook provides a substantial advance in the computation of elementary and special functions of mathematics extending the function coverage of major programming languages well beyond their international standards including full support for decimal floating point arithmetic Written with clarity and focusing on the C language the work pays extensive attention to little understood aspects of floating point and integer arithmetic and to software portability as well as to important historical architectures It extends support to a future 256 bit floating point format offering 70 decimal digits of precision Select Topics and Features references an exceptionally useful author maintained MathCW website containing source code for the book's software compiled libraries for numerous systems pre built C compilers and other related materials offers a unique approach to covering mathematical function computation using decimal arithmetic provides extremely versatile appendices for interfaces to numerous other languages Ada C C Fortran Java and Pascal presupposes only basic familiarity with computer programming in a common language as well as early level algebra supplies a library that readily adapts for existing scripting languages with minimal effort supports both binary and decimal arithmetic in up to 10 different floating point formats covers a significant portion with highly accurate implementations of the U S National Institute of Standards and Technology's 10 year project to codify mathematical functions This highly practical text reference is an invaluable tool for advanced undergraduates recording many lessons of the intermingled history of computer hardware and software numerical algorithms and mathematics In addition professional numerical analysts and others will find the handbook of real interest and utility because it builds on research by the mathematical software community over the last four decades

Integrative Study of the Mean Sea Level and Its Components Anny Cazenave,Nicolas Champollion, Frank Paul,Jérôme Benveniste,2017-04-28 This volume presents the most recent results of global mean sea level variations over the satellite altimetry era starting in the early 1990s and associated contributions such as glaciers and ice sheets mass loss ocean thermal expansion and land water storage changes Sea level is one of the best indicators of global climate changes as it integrates the response of several components of the climate system to external forcing factors including anthropogenic forcing and internal climate variability Providing long accurate records of the sea level at global and regional scales and of

the various components causing sea level changes is of crucial importance to improve our understanding of climate processes at work and to validate the climate models used for future projections The Climate Change Initiative project of the European Space Agency has provided a first attempt to produce consistent and continuous space based records for several climate parameters observable from space among them sea level This book presents current knowledge of the sea level budget over the altimetry era and 20th century Previously published in Surveys in Geophysics Volume 38 Issue 1 2017

Developments and Applications of Geomatics Shashi Mesapam, Anurag Ohri, Venkataramana Sridhar, Nitin Kumar Tripathi, 2024-02-26 This volume presents the selected papers from the International virtual conference on Developments and Applications of Geomatics It covers a wide range of topics of GIS applications such as agricultural studies climate change monitoring and impacts floods monitoring natural disasters environmental impact assessment ecosystem management and sustainable development industrial pollution structural health monitoring unmanned aerial vehicles transportation planning geological mapping 3D modelling and web GIS applications This book will be useful for researchers and professionals from various fields whose work includes geographic information system *Achieving sustainable crop nutrition* Prof Zed Rengel, 2020-02-18 Focus on integrating research on nutrient cycling crop nutrient processing and the environmental impact of fertiliser use to identify ways of improving nutrient use efficiency NUE in the use of particular fertilisers Includes research on a range of secondary macronutrients and micronutrients including calcium magnesium zinc boron manganese and molybdenum Reviews a wide range of options for reducing optimising current levels of fertiliser use *Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges* Nigel Powers, Dan Frangopol, Riadh Al-Mahaidi, Colin Caprani, 2018-07-04 Maintenance Safety Risk Management and Life Cycle Performance of Bridges contains lectures and papers presented at the Ninth International Conference on Bridge Maintenance Safety and Management IABMAS 2018 held in Melbourne Australia 9-13 July 2018 This volume consists of a book of extended abstracts and a USB card containing the full papers of 393 contributions presented at IABMAS 2018 including the T Y Lin Lecture 10 Keynote Lectures and 382 technical papers from 40 countries The contributions presented at IABMAS 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance safety risk management and life cycle performance Major topics include new design methods bridge codes heavy vehicle and load models bridge management systems prediction of future traffic models service life prediction residual service life sustainability and life cycle assessments maintenance strategies bridge diagnostics health monitoring non destructive testing field testing safety and serviceability assessment and evaluation damage identification deterioration modelling repair and retrofitting strategies bridge reliability fatigue and corrosion extreme loads advanced experimental simulations and advanced computer simulations among others This volume provides both an up to date overview of the field of bridge engineering and significant contributions to the process of more rational decision making on bridge maintenance safety risk management and life cycle

performance of bridges for the purpose of enhancing the welfare of society The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including students researchers and engineers from all areas of bridge engineering *Co-creating Sustainable Urban Futures* Niki Frantzeskaki, Katharina Hölscher, Matthew Bach, Flor Avelino, 2018-01-09 This is a unique book that provides rich knowledge on how to understand and actively contribute to urban sustainability transitions The book combines theoretical frameworks and tools with practical experiences on transition management as a framework that supports urban planning and governance towards sustainability The book offers the opportunity to become actively engaged in working towards sustainable futures of cities Readers of this book will be equipped to understand the complexity of urban sustainability transitions and diagnose persistent unsustainability problems in cities Urban planners and professionals will build competences for designing transition management processes in cities and engaging with multidisciplinary knowledge in solution seeking processes The heart of the book marks the variety of very different local case studies across the world including amongst others Rotterdam in the Netherlands La Botija in Honduras Sydney in Australia and Cleveland in the US These rich studies give inspiration and practical insights to young planners on how to create sustainable urban futures in collaboration with other stakeholders The case studies and critical reflections on applications of transition management in cities offer food for thought and welcome criticism They also introduce new lenses to understand the bigger picture that co creation dynamics play in terms of power dis empowerment legitimacy and changing actor roles This will equip the readers with a deep understanding of the dynamics opportunities and challenges present in urban contexts and urban sustainability transitions **Climate Change and Environmental Concerns: Breakthroughs in Research and Practice** Management Association, Information Resources, 2018-04-06 The existence of the human race has created inevitable effects on our surrounding environment To prevent further harm to the world s ecosystems it becomes imperative to assess mankind s impact on and create sustainability initiatives to maintain the world s ecosystems *Climate Change and Environmental Concerns Breakthroughs in Research and Practice* is a comprehensive reference source for the latest scholarly material on the environmental effects of climate change on human health and the mitigation of climate change on both a local and global level Highlighting a range of pertinent topics such as sustainable land use greenhouse gas effects and environmental education this publication is ideally designed for policy makers professionals government officials upper level students and academics interested in emerging research on climate change *Big Data for Urban Sustainability* Stephen Jia Wang, Patrick Moriarty, 2018-03-22 This book presents a practical framework for the application of big data cloud and pervasive and complex systems to sustainable solutions for urban environmental challenges It covers the technologies potential and possible and impact of big data on energy efficiency and the urban environment The book first introduces key aspects of big data cloud services pervasive computing and mobile technologies from a pragmatic design perspective including sample open source firmware Cloud

services mobile and embedded platforms interfaces operating system design methods networking and middleware are all considered The authors then explore in detail the framework design principles architecture and key components of developing energy systems to support sustainable urban environments The included case study provides a pathway to improve the eco efficiency of urban transport demonstrating how to design an energy efficient next generation urban navigation system by leveraging vast cloud data sets on user behavior Ultimately this resource maps big data s pivotal intersection with rapid global urbanization along the path to a sustainable future

Remote Sensing of Northwest Himalayan Ecosystems R. R. Navalgund,A. Senthil Kumar,Subrata Nandy,2018-10-18 Himalaya one of the global biodiversity hotspots is the abode of a variety of flora and fauna The Himalayan ecosystems have immense ecological socioeconomic and aesthetic significance as they provide a wide range of ecosystem services The northwest Himalaya NWH covering three states of India viz Uttarakhand Himachal Pradesh and Jammu and Kashmir starts from the foothills of Shivaliks in the south and extends to the greater Himalaya in the north This region is also the source of some of the major rivers of India With the increase in population the NWH ecosystems have been under threat due to deforestation loss of biodiversity expansion of agriculture and settlement overexploitation of natural resources habitat loss and fragmentation poaching mining construction of roads and large dams and unplanned tourism The Himalaya being young and geotectonically active remains inherently unstable fragile and prone to natural disasters Climate change is also likely to impact the Himalayan cryosphere drastically Recognizing the importance of the Himalaya a National Mission for Sustaining the Himalayan Ecosystem one of the eight missions under the National Action Plan on Climate Change NAPCC of Govt of India to conserve biodiversity forest cover and other ecological values in the Himalayan region has been taken up Spaceborne remote sensing with its ability to provide synoptic and repetitive coverage has emerged as a powerful tool for assessment and monitoring of the Himalayan resources and phenomena Indian Institute of Remote Sensing Dehradun has taken up a number of studies in the fields of geology water resources forestry agriculture urban settlement etc over the last decade The book summarises the work carried out in different disciplines illustrated with tables and figures and a host of relevant references It is hoped that the book serves as an excellent reference of immense value to the students researchers professors scientists professionals and decision makers working in the NWH region
