Gender and Climate Change Joane Nagel, 2015-08-05 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women's rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on the Assessment of Technologies for Improving Fuel Economy of Light-Duty Vehicles, Phase 2, 2015-09-28 The light duty vehicle fleet is expected to undergo substantial technological changes over the next several decades New powertrain designs alternative fuels advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards By the end of the next decade cars and light duty trucks will be more fuel efficient weigh less emit less air pollutants have more safety features and will be more expensive to purchase relative to current vehicles Though the gasoline powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030 such vehicles will be equipped with advanced technologies materials electronics and controls and aerodynamics And by 2030 the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation including autonomous vehicles will be well underway What are these new technologies how will they work and will some technologies be more effective than others Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration NHTSA and Environmental Protection Agency EPA Corporate Average Fuel Economy CAFE and greenhouse gas GHG emission standards this new report from the National Research Council is a technical evaluation of costs benefits and implementation issues of fuel reduction technologies for next generation light duty vehicles Cost Effectiveness and

Deployment of Fuel Economy Technologies for Light Duty Vehicles estimates the cost potential efficiency improvements and barriers to commercial deployment of technologies that might be employed from 2020 to 2030 This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017 2025 CAFE standards **Chemical News and Journal of Physical Science** ,1870 **Report to Congress of the**

Mathematics in Physics Education Gesche Pospiech, Marisa Michelini, Bat-Sheva Eylon, 2019-07-02 This book is about mathematics in physics education the difficulties students have in learning physics and the way in which mathematization can help to improve physics teaching and learning The book brings together different teaching and learning perspectives and addresses both fundamental considerations and practical aspects Divided into four parts the book starts out with theoretical viewpoints that enlighten the interplay of physics and mathematics also including historical developments The second part delves into the learners perspective It addresses aspects of the learning by secondary school students as well as by students just entering university or teacher students Topics discussed range from problem solving over the role of graphs to integrated mathematics and physics learning The third part includes a broad range of subjects from teachers views and knowledge the analysis of classroom discourse and an evaluated teaching proposal The last part describes approaches that take up mathematization in a broader interpretation and includes the presentation of a model for physics teachers pedagogical content knowledge PCK specific to the role of mathematics in physics Natural Fiber Composites R.D.S.G. Campilho, 2015-11-05 This book brings value to anyone working with or designing natural fiber composite structures It helps readers understand the value these materials can add to projects how to choose the best materials and treatments how to safely design and fabricate products made of natural fiber composites and how to test them for safety It covers the characterization of natural fibers matrices and respective composites and how to enhance their performance and processing as well as testing and degradation issues The long and short of mental time travel-- self-projection over time-scales large and small James M. Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory propection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with

experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales

World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada David A. Jaffray, 2015-07-13 This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics a tri annual high level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare It provides a unique and important forum to secure a coordinated multileveled global response to the need demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health

Decarbonizing Logistics Alan McKinnon, 2018-06-03 Logistics accounts for around 9 10% of global CO₂ emissions and will be one of the hardest economic sectors to decarbonize This is partly because the demand for freight transport is expected to rise sharply over the next few decades but also because it relies very heavily on fossil fuel Decarbonizing Logistics outlines the nature and extent of the challenge we face in trying to achieve deep reductions in greenhouse gas emissions from logistical activities It makes a detailed assessment of the available options including restructuring supply chains shifting freight to lower carbon transport modes and transforming energy use in the logistics sector The options are examined from technological and managerial standpoints for all the main freight transport modes Based on an up to date review of almost 600 publications and containing new analytical frameworks and research results Decarbonizing Logistics is the first to provide a global multi disciplinary perspective on the subject It is written by one of the foremost specialists in the field who has spent many years researching the links between logistics and climate change and been an adviser to governments international organizations and companies on the topic

Science Education Research and Practices in Taiwan Mei-Hung Chiu, 2015-08-04 This book highlights the development and outcomes of research on and practical experience in science education in Taiwan As the outcomes of the scholarship on science education in Taiwan have garnered attention in science education communities around the world this book gathers the most relevant

research on Taiwan presenting it in a cohesive overview that will move science education forward in terms of policy research and practice **Primary Care - E-Book** Terry Mahan Buttarro,JoAnn Trybulski,Patricia Polgar-Bailey,Joanne

Sandberg-Cook,2016-04-07 Prepare for success in today s fast paced collaborative healthcare environment Offering expert perspectives from a variety of primary care and nurse practitioners Primary Care A Collaborative Practice 5th Edition helps you diagnose treat and manage hundreds of adult disorders Care recommendations indicate when to consult with physicians or specialists and when to refer patients to an emergency facility This edition includes six new chapters a fresh new design the latest evidence based guidelines and a new emphasis on clinical reasoning Combining academic and clinical expertise an author team led by Terry Mahan Buttarro shows NPs how to provide effective truly interdisciplinary health care UNIQUE A collaborative perspective promotes seamless continuity of care with chapters written by NPs physicians PAs and other primary care providers Comprehensive evidence based content covers every major disorder of adults seen in the outpatient office setting reflects today s best practices and includes the knowledge you need for the NP DNP level of practice A consistent format in each chapter is used to describe disorders facilitating easier learning and quick clinical reference Diagnostics and Differential Diagnosis boxes provide a quick reference for diagnosing disorders and making care management decisions Complementary and alternative therapies are addressed where supported by solid research evidence Referral icons highlight situations calling for specialist referral or emergency referral NEW chapters cover topics including transitional care risk management LGBTQ patient care bullous pemphigoid pulmonary embolism and dysphagia NEW An emphasis on clinical reasoning helps you develop skills in diagnosis and treatment with coverage moving away from pathophysiology and toward diagnostic reasoning and disease management including pharmacologic management NEW focus on interdisciplinary care underscores the importance of interprofessional education and practice and includes Interdisciplinary Management features UPDATED chapters reflect the latest literature and evidence based treatment guidelines including new content on the Affordable Care Act as well as new coverage of patient satisfaction metrics quality metrics value based purchasing pharmacogenetics genomics and teen pregnancy and abnormal pregnancy NEW quick reference features make it easier to locate important information through colorful section tabs bulleted summaries additional algorithms a more logical table of contents an Index to Standardized Treatment Guidelines and a Reference to Common Laboratory Values **Oral Exams** A.
