The Revival of the 2-stroke Engine and Studying Flex Fuel Engines Jay Meldrum, 2017-02-01 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using the EPA test procedure and standard for off road vehicles. Innovative technology solutions include Engine Design improving the two stroke gas direct injection GDI engine. Applications of new muffler designs and a catalytic converter. Solving flex fuel design and engine power problems. The SAE International Clean Snowmobile Challenge CSC program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors modified snowmobiles are also expected to be cost effective and comfortable for the operator to drive.
