Shrader,1999-06-30 Using recently released French official documents and a variety of other sources this study explains how the French Army so recently defeated by the Viet Minh insurgents in Indochina was able to successfully defeat the Algerian nationalist rebels on the battlefield while nevertheless losing the war at the conference table This French success between 1954 and 1962 was due in large part to the superior logistical system of the French Army and the use of the helicopter to enhance French operational mobility French counter mobility measures particularly the construction of heavily defended interdiction zones on the eastern and western borders of Algeria proved highly effective against the rebels Such methods essentially cut off the rebel forces from their bases and from sources of supply located outside Algeria and consequently strangled and destroyed the rebel forces within Algeria No other work on the Algerian War focuses upon the role of logistics in the outcome of the conflict The detailed statistical data and comprehensive description and analysis of the logistical organizations and methods of both the French and the nationalist rebels are supplemented by excellent maps This study also provides useful insights into the nature of the wars of national liberation and counter insurgency doctrines that dominated military affairs in the mid 20th century **Automotive Industries** ,1918 **Departments of Transportation, and Housing and Urban Development, and Related Agencies Appropriations for 2018: FY 2018 budget justifications: National Highway Traffic Safety Administration; Federal Railroad Administration; Federal Transit Administration; Saint Lawrence Seaway Development Corporation; Maritime Administration; Pipeline and Hazardous Materials Safety Administration; Office of Inspector General; Surface Transportation Board** United States.
