Innovation Cristiano Antonelli, The notion of endogenous innovation as the outcome of the creative response of firms to out of equilibrium conditions is the cornerstone of the new evolutionary complexity This book elaborates and applies the theoretical framework established in the author's previous work *Endogenous Innovation The Economics of an Emergent System* Property This volume carefully explores the role of the reactivity of firms to out of equilibrium conditions It also examines the quality of knowledge governance mechanisms in assessing the levels of externalities that define the likelihood of creative responses as an alternative to adaptive responses **A Modern Guide to Knowledge** Francisco J. Audretsch, Albert N.

Link, 2019-01-01 *Sources of Knowledge and Entrepreneurial Behavior* delves into the nature and importance of the relationship between sources of knowledge and entrepreneurial behavior and should be of interest to both academics and policy makers David B Audretsch and Albert N Link use the Knowledge Spillover Theory of Entrepreneurship as the conceptual foundation for why individuals decide to become entrepreneurs Then using a database of more than 4 000 small and relatively new European companies from 10 different countries called the AEGIS database Audretsch and Link offer new insights about the relationship between knowledge sources and entrepreneurial behavior In their analysis of the empirical evidence in support of the Knowledge Spillover Theory of Entrepreneurship Audretsch and Link conclude that there is no

singular source of knowledge driving entrepreneurship but a plethora of knowledge sources each associated with different dimensions of entrepreneurial activity The intellectual breakthrough in this book is not that knowledge matters or that it especially matters for entrepreneurship Rather Audretsch and Link show that knowledge and especially entrepreneurial knowledge is not a homogeneous phenomenon There are multiple sources of knowledge that act on entrepreneurial performance in a myriad of ways

Endogenous Innovation Cristiano Antonelli, This ground breaking new book builds upon the Schumpeterian creative response The author shows that firms in out of equilibrium conditions try and react by means of introducing innovations The success of their reaction is contingent upon their access conditions to knowledge which are shaped by the system in which they operate The emergence of new innovations can in turn knock firms further out of equilibrium and cause changes in the system properties that govern their access to external knowledge This path dependent loop of interactions between the system properties and the individual
