What is Sage 300 ERP?

Sage 300 ERP is an enterprise resource planning (ERP) software application for small and medium-sized businesses. It features a user authorization export function that allows you to export user permissions and roles from the ERP system into a spreadsheet or text file. This enables you to create a list of authorized users and assign specific permissions to each user. You can then use this information to manage user access in a centralized location.

How to authorize users in Sage 300 ERP?

In most cases, users in Sage 300 ERP should be authorized through the system's user management system. The following steps outline how to authorize users:

1. Log into the user management system and select Users from the menu on the left-hand side.
2. Select an individual user from the list of users and click on their name in the top right-hand corner of the screen.
3. On the User Authorization tab, you will see a list of permissions that have been assigned to this user. Click on the checkbox next to each permission that you want to authorize this user to have.
