Propulsion Technology for U.S. Space-launch Vehicles J. D. Hunley, 2007 In this definitive study J D Hunley traces the program's development from Goddard's early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight *Regional Industrial Buying Guide*, 2001 **InfoWorld**, 1987-06-01 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Military Review**, 1993 *Popular Mechanics*, 1974-11 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it's practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Professional Journal of the United States Army**, 1993 *Sounding Human* Deirdre Loughridge, 2024-01-05 An expansive analysis of the relationship between human and machine in music From the mid eighteenth century on there was a logic at work in musical discourse and practice human or machine That discourse defined a boundary of absolute difference between human and machine with a recurrent practice of parsing human musicality from its merely mechanical simulations In *Sounding Human* Deirdre Loughridge tests and traverses these boundaries unmaking the human or machine logic and seeking out others better characterized by conjunctions such as and or with *Sounding*

Human enters the debate on posthumanism and human machine relationships in music exploring how categories of human and machine have been continually renegotiated over the centuries Loughridge expertly traces this debate from the 1737 invention of what became the first musical android to the creation of a sound wave instrument by a British electronic music composer in the 1960s and the chopped and pitched vocals produced by sampling singers voices in modern pop music From music generating computer programs to older musical instruments and music notation Sounding Human shows how machines have always actively shaped the act of music composition In doing so Loughridge reveals how musical artifacts have been or can be used to help explain and contest what it is to be human
