EEAnyone who has spent time with friends will notice that each one has a special personality all of their own. Friends, have different traits that make up their personalities. A sense of humor, great advice, and honesty are all things that come to mind when you think about a friend. Friends are important to have because they are a backbone when things get tough in life and are always there to love and support. However, anyone who has spent time with friends will notice that each one has a special personality with respect to their honesty, loyalty, and care. There are three major types of friends, which are acquaintances, social friends, and best friends.

The first type of friend is simply an acquaintance. This means that you basically only know their name. Not even remembering what they look like. You usually meet these type of friends in school, at work, on the bus, in the gym, or anywhere else you might be. You normally would not mind having a cup of coffee with them, but if anything else came up, you would have no problem parting company. We see many people in the work. Sometimes we speak them compulsorily and we don't remember even their face. While we are on the bus, we come across some people who get on the bus regulars like us. Therefore we call them as an acquaintance. Someone you know socially or through the business world would be called an acquaintance if you don't know them well personally.

An acquaintance can remain a personal or business contact for you or can become a friend at some point. It depends on the relationship and the people involved. You may have some acquaintances you see over and over throughout your life that you never really get to know. However, they are still good people to know because they can connect you to potential friends. This group includes people who one talks to out of awkward obligation. Observed in their natural habitats of classrooms, bus seats, and the general public acquaintances are random encounters. A person often speaks to this species out of necessity, loneliness, or boredom. For instance, when a person is alone in the bus station with nothing to do, they see a person reading a magazine and decide to make conversation about that magazine. This is not done to bother the other person, and usually both people don't care but it's a tool to make a person feel less alone. This sect of friends does not evolve past a random encounter or conversation. Acquaintances include people who one exploits for their own personal gain.

The second category of friends is a social partner. One you often meet at social occasions, or one who may accompany you to social gatherings, but with whom you don't have a personal relationship. This is because they are closer than acquaintances, but nowhere near as close as a true friend. Social partners are usually acquaintances who evolve into "guest friends" through increased extracurricular activities. You know their name, a little of what...
