

A Samsung television is shown from a front-facing perspective. The screen displays a vibrant, high-resolution image of a butterfly perched on a green leaf. The leaf is covered in numerous clear water droplets, which are rendered with sharp detail and realistic reflections. The background of the image on the screen is a soft-focus green, suggesting a natural outdoor setting. The Samsung logo is visible in the top left corner of the screen. The text 'Crystal UHD' is displayed in the bottom right corner of the screen. The television itself has a thin black bezel and is supported by two black stands at the bottom.

Samsung Led Tv Series 4manual:

The Screen Media Reader Stephen Monteiro,2017-01-12 Offers key historical and interpretative texts on the development and role of the screen in communications and the social sphere **Forged in War** R. David Lankes,2021-05-15 I deal for readers seeking a more comprehensive look at information dissemination technology its context and its impact on the way in which we now live Library Journal Starred Review Many of what we think of as Information Age tools and media computers cell phones the internet encryption and more evolved directly out of modern warfare These tools started with World War I which began not with arms but with England cutting off underwater cables to Germany and isolating it accelerated through World War II and the Cold War and now play a center role in both declared and non declared conflicts like election interference and cyberbattles We buy phones and smart speakers because they are new and unlock great potential Voice assistants like Siri and Alexa help us do our work and answer that one piece of trivia that bugs us Yet these devices are data gatherers They collect repackage and monetize our questions purchases photographs web surfing to form a data industry now larger than the oil industry Well over 100 years ago the data industry put in place a business model that trades our attention for news and entertainment That model has evolved into a complex art and science of message targeting and content ownership that has splintered communities while simultaneously concentrating media ownership to a few massive corporations Forged in War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good It tells a compelling and previously story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview Author David Lankes s work has been funded by organizations such as The MacArthur Foundation The Institute for Library and Museum Services NASA The U S Department of Education The U S Department of Defense The National Science Foundation and The U S State Department This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine
