### Investment in the Future

- Do not expect that appropriate communication of statistics is best achieved by increasing the number of statistical channels.
- Do not expect that the appropriate communication methods are the appropriate ones, and this can result in a lot of wasted time.
- Do not expect that appropriate communication is a simple task.
- Research has shown that a well-planned communication process can be more effective than a poorly planned one. This is especially true for the most complex, high-stakes situations. For example, the most effective way to communicate a crisis is to use a well-planned communication process that is based on a clear understanding of the situation and the needs of the audience.
- Do not expect that a well-planned communication process will be more effective than a poorly planned one.

**Abstract**—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or a training group (TRN). The TRN group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The CON group remained sedentary. The HR and EE were measured at baseline and at the end of the 12-week training program. The TRN group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can improve the cardiovascular fitness and energy expenditure of sedentary, middle-aged women.

- Day and night temperatures that are longer than the standard atmospheric conditions will negatively affect the rate of decomposition of organic materials found. Likewise, that are far below the ground surface may be far above the ground.
- Ground moisture conditions will negatively affect the rate of decomposition in specific situations, the length of the season may affect decomposition on the soil surface as well.
- The soil's pH level will negatively affect the rate of decomposition. The soil is acidic, the process of putrefaction is inhibited, and the soil's pH level is not suitable for these species of microorganisms. Some have been reported about the 500 years a body.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will want to produce more of the output, and if the price falls, the producer will want to produce less of the output.

**Caution:** Spilling, pouring, or collecting water from a Tivvy cooler into the TivvyBall is just fine. But, intentionally submerging the ball (even in a shallow tub) is not. The TivvyBall may rupture! It's the top-down pouring technique required in almost all cases of safely transporting pressurized air. The TivvyBall is not a TivvyBall if it's not sealed properly, and safely, please pump/cover and install it this way. (See below, "Sealing the TivvyBall" and "The TivvyBall Approach")
