

The Politics of Improving Learning Outcomes in South Africa

PE 03

Martin Gustafsson and Nick Taylor

Abstract

Political economy and ideology are important determinants of educational development. The authors examine this in the South African context, using an approach which is in part dialogical, while paying special attention to the acquisition of foundational skills in the early grades. South Africa's apartheid legacy, and the predominance of the upper secondary school-leaving certificate, shaped the policy discourse in ways that often marginalised the question of foundational skills. Post-1994, the political urgency of providing quality schooling to the emerging black middle class could have diverted attention from improving the quality of education for the poorest segments of society, despite official policy commitments to serving the poor. Notwithstanding these limitations, South Africa has seen substantial gains in learning outcomes in the last twenty years, driven mainly by improvements among the least advantaged. Yet outcomes remain well below those of other middle income countries. Several political and non-political factors could impede further gains. Education planning capacity remains weak. The quality of teacher training at universities is considered poor. The electoral system rewards politicians who respond to popular demands, but such demands tend to focus on very visible phenomena such as school infrastructure and obtaining the Grade 12 certificate. Learning in the early grades has become more visible due to work occurring in samples or pockets of the system. How to make this visible across all primary schools through better availability of information, and better systems development capacity, and how to link information to school accountability in ways that avoid pitfalls experienced in South Africa's recent past, are politically and ideologically charged questions. Corruption has adversely affected the schooling system, most noticeably with respect to who is promoted, but the wider erosion of institutions caused by corruption undermines schooling in more insidious ways. The South African experience confirms that a more politically informed approach to education policy analysis is illuminating and necessary. The emergence of a specialist literature on the political economy of education is helpful. However, a complete treatment of politics in the education policy arena should include analysis of ideological narratives employed by contesting elites, and how these narratives almost gain 'a life of their own', independently of what their proponents may have intended.

Postmodern Moments in Modern Economics David F. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the

implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today

Political Economy and Public Finance Stanley L. Winer, Hirofumi Shibata, 2002-01-01 There is a long standing difference amongst public economists between those who think that collective choice must be formally acknowledged and those who derive their policy recommendations from a social planning framework in which politics plays no role The purpose of this book is to contribute to a meaningful dialogue between these two groups in the belief that the future of both political economy and of normative public finance lies somewhere between the two approaches Some of the specific questions addressed in the book include does public finance need political economy Should collective choice play a role in the standard of reference used in normative public finance What is a failure in a non market or policy process And what have we learned about the theory and practice of public finance from three decades of empirical research on public choice The book also provides a practitioner's view of the political economy of redistribution
