

DISOCONT® Measurement, Control and Supervisory System

- Field housing electronics integration able into scale mechanics
- New product line for 'MechaTronic scales' a synthesis of mechanics, electrics and software
- Reduced engineering planning and wiring costs
- Optimal communication structures because of modular fieldbus technology

Application

DISOCONT® is a modular electronics system, applicable to any weighing and feeding system. It is used whenever bulk solids flow has to be measured, feeded or batched with the use of

- Loss-in-weight feeders (measuring/feeding)
- Weighfeeders
- Mass flow meters and feeders
- Solids flow meters and feeders
- Belt weighers
- Weighing hoppers

The DISOCONT® electronics are preferably integrated locally into the scale mechanics. So self-contained function units will be created - the MechaTronic scales - which offers numerous advantages:

- Reduced engineering because of minimal number of interfaces; only one unit has to be planned in
- No control cubicle
- Reduced cabling; only power and data cables have to be run

- At a glance - easy service because of the combination of mechanics and electronics

DISOCONT® electronics may be conventionally installed in a control cubicle (e.g. for use with feeders in hazardous zones). The DISOCONT® equipped with appropriate communication module optimally integrates into the automation structure via field bus.

Equipment

The DISOCONT® electronics consist of a system unit and multiple optional expansion units. Its modular design enables the requisite units to be combined for a specific application, at a most cost effective price.

- System unit for all measuring and control functions; equipped with service plug for connection of laptop or control unit, for configuration, calibration and service with an exchangeable memory module for system specific settings and operating values

- Fieldbus communication module, plugged into system unit for transfer of all relevant data to the user's control and scale control system
- Input/output unit for conventional connection to user's control system and expanded control of the scale environment
- EasyServe - PC-program for commissioning and service
- Operator panel with clear graphic text display for local scale control and/or parametrization of standard applications
- Group control units: operation, survey and control of scale groups, as shown in separate spec. sheet

The internal DISOCONT® communication bus permits a flexible arrangement of the I/O units, locally or in cabinets. All modules can be replaced with no need for recalibration and reconfiguration (Plug & Play).

The program includes housing options for installation at site and in control cubicles.
