Computational Models for CO2 Geo-sequestration & Compressed Air Energy Storage Rafid Al-Khoury, Jochen Bundschuh, 2014-04-17 A comprehensive mathematical and computational modeling of CO2 Geosequestration and Compressed Air Energy Storage Energy and environment are two interrelated issues of great concern to modern civilization As the world population will soon reach eight billion the demand for energy will dramatically increase intensifying the use of fossil fuels

Geologic Carbon Sequestration V. Vishal, T.N. Singh, 2016-05-11 This exclusive compilation written by eminent experts from more than ten countries outlines the processes and methods for geologic sequestration in different sinks It discusses and highlights the details of individual storage types including recent

advances in the science and technology of carbon storage The topic is of immense interest to geoscientists reservoir engineers environmentalists and researchers from the scientific and industrial communities working on the methodologies for carbon dioxide storage Increasing concentrations of anthropogenic carbon dioxide in the atmosphere are often held responsible for the rising temperature of the globe Geologic sequestration prevents atmospheric release of the waste greenhouse gases by storing them underground for geologically significant periods of time The book addresses the need for an understanding of carbon reservoir characteristics and behavior Other book volumes on carbon capture utilization and storage CCUS attempt to cover the entire process of CCUS but the topic of geologic sequestration is not discussed in detail This book focuses on the recent trends and up to date information on different storage rock types ranging from deep saline aquifers to coal to basaltic formations

Deutsch, 2008-01-24 The return of the congress to North America after 20 years of absence could not have been in a more ideal location The beauty of Banff and the many offerings of the Rocky Mountains was the perfect background for a week of interesting and innovative discussions on the past present and future of geostatistics The congress was well attended with approximately 200 delegates from 19 countries across six continents There was a broad spectrum of students and seasoned geostatisticians who shared their knowledge in many areas of study including mining petroleum and environmental applications You will find 119 papers in this two volume set All papers were presented at the congress and have been peer reviewed They are grouped by the different sessions that were held in Banff and are in the order of presentation These papers provide a permanent record of different theoretical perspectives from the last four years Not all of these ideas will stand the test of time and practice however their originality will endure The practical applications in these proceedings provide nuggets of wisdom to those struggling to apply geostatistics in the best possible way Students and practitioners will be digging through these papers for many years to come Oy Leuangthong Clayton V Deutsch **ACKNOWLEDGMENTS** We would like to thank the industry sponsors who contributed generously to the overall success and quality of the congress De
