**Scholars, Policymakers, and International Affairs** Abraham F. Lowenthal, Mariano E. Bertucci, 2014-11-24 How to strengthen both academic research and international policies by improving the connections between scholars and policymakers *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy Drawing on contributions from top international scholars with policy experience in the United States Europe Asia Canada and Latin America as well as senior policymakers throughout the Americas Abraham F Lowenthal and Mariano E Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality Many policymakers believe that scholars are absorbed in abstract and self referential debates and that they are primarily interested in crafting theories and impressing other scholars rather than developing solutions to pressing policy issues The contributors to this book confront this gap head on They do not deny the obstacles to fruitful interaction between scholars and policymakers but drawing on their own experience discuss how these obstacles can be and have been overcome They present case studies that illustrate how scholars have helped reduce income inequality promote democratic governance improve gender equity target international financial sanctions manage the Mexico U S border and enhance inter American cooperation These success stories are balanced by studies on why academic analysts have failed to achieve much positive impact on counternarcotics and citizen security policies The editors astute conclusion identifies best practices and provides concrete recommendations to government agencies international institutions nongovernmental organizations and funding sources as well as to senior university officials academic departments and centers think tanks established scholars junior faculty and graduate students Clearly written and thoughtfully organized this innovative book provides analytic insights and practical wisdom for those who want to understand how to build more effective connections between the worlds of thought and action

**Making Global Knowledge in Local Contexts** Katarzyna Kaczmarek, 2020-04-08 This book draws on extensive ethnographic research undertaken in Russia to show how the wider sociopolitical context the political system relationship between the state and academia as well as the contours of the public debate shapes knowledge about international politics and influences scholars engagement with the policy world Combining an in depth study of the International Relations discipline in Russia with a robust methodological framework the book demonstrates that context not only bears on epistemic and disciplinary practices but also conditions scholars engagement with the wider public and policymakers This original study lends robust sociological foundations to the debate about knowledge in International Relations and the social sciences more broadly In particular the book questions contemporary thinking about the relationship between knowledge and politics by situating the university within rather than abstracting it from the political setting The

The Politics of Expertise in International Organizations Annabelle Littoz-Monnet, 2017-02-24 This edited volume advances existing research on the production and use of expert knowledge by international bureaucracies Given the complexity technicality and apparent apolitical character of the issues dealt with in global governance arenas evidence based policy making has imposed itself as the best way to evaluate the risks and consequences of political action in global arenas In the absence of alternative democratic modes of legitimation international organizations have adopted this approach to policy making By treating international bureaucracies as strategic actors this volume address novel questions why and how do international bureaucrats deploy knowledge in policy making Where does the knowledge they use come from and how can we retrace pathways between the origins of certain ideas and their adoption by international administrations What kind of evidence do international bureaucrats resort to and with what implications Which types of knowledge are seen as authoritative and why This volume makes a crucial contribution to our understanding of the way global policy agendas are shaped and propagated It will be of great interest to scholars policy makers and practitioners in the fields of public policy international relations global governance and international organizations

Think Tank Diplomacy Melissa Conley Tyler, Rhea Matthews, Emma Brockhurst, 2017-10-02 If a key aspect of diplomacy is how countries are seen abroad official diplomats are not the only actors In contexts as diverse as Syria Myanmar and the South China Sea think tanks are influential actors whose impact deserves greater study As organisations producing independent intellectual outputs to influence public policy think tanks engage in at least four diplomatic functions negotiation communication information gathering and promoting friendly relations in international affairs Detailed case studies show that think tanks both directly perform and indirectly support diplomatic functions as metaphorical hired guns charm offensive witnesses and safe space as a school for diplomats personal trainers chief knowledge officer and wise counsel To reach their full potential think tanks need to overcome obstacles including resource constraints and relationships with policymakers

**Bridging the Theory-Practice Divide in International Relations** Daniel Maliniak, Susan Peterson, Ryan Powers, Michael J. Tierney, 2020-05-01 There is a widening divide between the data tools and knowledge that international relations scholars produce and what policy practitioners find relevant for their work In this first of its kind conversation leading academics and practitioners reflect on the nature and size of the theory practice divide They find the gap varies by issue area and over time The essays in this volume use data gathered by

the Teaching Research and International Policy TRIP Project over a fifteen year period As a whole the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so Individual chapters explore these questions in the areas of trade finance human rights development environment nuclear weapons and strategy interstate war and intrastate conflict Each substantive chapter is followed by a response from a policy practitioner providing their perspective on the gap and the possibility for academic work to have an impact Bridging the Theory Practice Divide in International Relations provides concrete answers and guidance about how and when scholarship can be policy relevant

**Informal Governance in World Politics** Kenneth W. Abbott, Thomas J. Biersteker, 2024-05-30 Throughout the nineteenth and twentieth centuries cooperation among nations was based on international regimes and formal intergovernmental organizations However since the 1990s informal modes of global governance such as informal intergovernmental organizations and transnational public private governance initiatives have proliferated Even within formal intergovernmental organizations informal means of influence and informal procedures affect outcomes whilst around all these institutions even more informal networks shape agendas This volume introduces and analyzes these three types of informality in governance informality of within and around institutions An introductory chapter traces the rise of informal governance and suggests a range of theoretical perspectives and variables that may explain this surge Empirical chapters then apply these and other explanations to diverse issue areas and cross cutting issues often using newly developed datasets or original case study research The concluding chapter sets out a research agenda on informality in global governance including its normative implications

Global Diplomacy Thierry Balzacq, Frédéric Charillon, Frédéric Ramel, 2019-11-08 This volume brings together different approaches to diplomacy both as an institution and a practice The authors examine diplomacy from their own backgrounds and through sociological traditions which shape the study of international relations IR in Francophone countries The volume's global character articulates the Francophone intellectual concerns with a variety of scholarships on diplomacy providing a first contact with this subfield of IR for students and practitioners **Human Capital versus Basic Income** Fabian A

Borges, 2022-02-23 Latin America underwent two major transformations during the 2000s the widespread election of left leaning presidents the so called left turn and the diffusion of conditional cash transfer programs CCTs innovative social programs that award regular stipends to poor families on the condition that their children attend school Combining cross national quantitative research covering the entire region and in depth case studies based on field research *Human Capital versus Basic Income Ideology and Models for Anti Poverty Programs in Latin America* challenges the conventional wisdom

that these two transformations were unrelated In this book author Fabi n A Borges demonstrates that this ideology greatly influenced both the adoption and design of CCTs There were two distinct models of CCTs a human capital model based on means tested targeting and strict enforcement of program conditions exemplified by the program launched by Mexico s right and a more universalistic basic income model with more permissive enforcement of conditionality exemplified by Brazil s program under Lula These two models then spread across the region Whereas right and center governments with assistance from international financial institutions enacted CCTs based on the human capital model the left with assistance from Brazil enacted CCTs based on the basic income model The existence of two distinct types of CCTs and their relation to ideology is supported by quantitative analyses covering the entire region and in depth case studies based on field research in three countries Left wing governments operate CCTs that cover more people and spend more on those programs than their center or right wing counterparts Beyond coverage a subsequent analysis of the 10 national programs adopted after Lula s embrace of CCTs confirms that program design evaluated in terms of scope of the target population strictness of conditionality enforcement and stipend structure is shaped by government ideology This finding is then fleshed out through case studies of the political processes that culminated in the adoption of basic income CCTs by left wing governments in Argentina and Bolivia and a human capital CCT by a centrist president in Costa Rica

**Governing through Expertise** Annabelle Littoz-Monnet,2020-11-05 Littoz Monnet provides a fresh analysis of the enmeshment of expert knowledge with politics in global governance through a unique investigation of bioethical expertise an intriguing form of expert knowledge which claims authority in the ethical analysis of issues that arise in relation to biomedicine the life sciences and new fields of technological innovation She makes the case that the mobilisation of ethics experts does not always arise from a motivation to rationalise governance Instead mobilising ethics experts who are endowed with a unique double edged authority both democratic and epistemic can help policy makers manoeuvre policy conflicts on scientific and technological innovations and make their pro science and innovation agendas possible Bioethical expertise is indeed shaped in a political and iterative space between experts and those who do policy The book reveals the mechanisms through which certain global governance narratives as well as the types of expertise they rely on remain stable even when they are contested
