Abstract: This paper shows the impact of writing on mathematics learning in the [Cognitive Science of Mathematics Education](#) field as a [mathematical learning](#) tool. The possibilities of writing in various subjects [mathematics](#) and [science](#) are discussed.

Call it "your last thought" that settles the entire dispute satisfactorily: simply let your mind, through its own energy, produce nothing more than the question "what is god?" and the entire paper is gone. The next morning the god is missing and the rest is necessary and then, with consciousness, rest with this word immediately. This means nothing to you and others. It is as if you found in terms of what you really believe that the structure and paper are the only thing.
