**The Monday Report** Florida. Dept. of Education,1998      **Education Reform in Florida** Kathryn M. Borman,Sherman Dorn,2012-02-01 In Education Reform in Florida sociologists and historians evaluate Governor Jeb Bush s nation leading school reform policies since 1999 They examine the startlingly broad range of education policy changes enacted in Florida during Bush s first term including moves toward privatization with a voucher system more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education The contributors arrive at a mixed conclusion regarding Bush s first term education policies while he deserves credit for holding students to higher standards his policies have unfortunately pushed for equality in a very narrow way The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students      Florida Statistical Abstract 2010 ,2011      **Proceedings of the ... Annual Meeting of the Florida State Horticultural Society** Florida State Horticultural Society. Annual Meeting,2002      *Florida County Rankings* ,2008      **Florida Statistical Abstract** ,2004      Florida Statistical Abstract 2006 ,2006      Profiles of Florida David Garoogian,2005      **Florida Statistical Abstract 2005** Phoebe A. Wilson,2006      **Florida Statistical Abstract 2003** ,1994      **FCAT Retrospective** Terry Froman,Vilma Rubiera,Aleksander Shneyderman,2006 The Florida Comprehensive Assessment Test FCAT is the primary measure of student achievement applied to the grading of the Florida public schools School grades utilize a point system in which schools are awarded one point for every percent of students 1 scoring in achievement levels 3 5 in Reading 2 demonstrating learning gains in Reading 3 in the lowest 25% of Reading making gains 4 scoring in achievement levels 3 5 in Mathematics 5 demonstrating learning gains in Mathematics and 6 scoring 3 5 or above in Writing Each school gets points toward their school grade in direct proportion to the number of students meeting the standards in six different component areas This paper depicts the changes in FCAT points earned toward school grades in both the District and the State over the last three years In all component except Writing where standards were raised in 2005 the District has demonstrated greater gains than the State and in some components exceeded the State s performance It is important to exercise caution in attributing changes in student achievement to specific causes There are a great many of potential influences on achievement and in many cases trends in the district seem to be paralleled by similar trends across the state However the improvements observed over the past three years in achievement scores and school grades are hard to interpret as anything but substantial improvement for the district      Is There Something Else Wrong with the FCAT? Terry Froman,2007 Because 3rd Grade Florida Comprehensive Assessment Test FCAT scores have a direct impact on promotion the results for that grade level are released early by the State When the FCAT results for 3rd Grade were released in May 2007 many people were troubled Over 80% of the elementary schools in the Miami Dade School District showed a decrease in the percentage of students scoring in Levels 3 and above in Reading Similar trends produced an outcry across the state After an 8 percentage point

jump in the previous year there was a statewide drop of 6 percentage points in 2007 These results were more than surprising and cast doubt on the soundness of the scoring process After a careful review the Education Commissioner announced that there did appear to be a problem in the scoring of the test and a rescaling of the 3rd Grade FCAT reading exam would be forthcoming This admission by the State while honorable and praiseworthy opened the door for many to question other aspects of the FCAT test sometimes without just cause While it is clearly unfair to discount the overall precision and usefulness of the FCAT some form of careful review of scores is nonetheless proper The search for the same kind of irregular trends in the data that brought this type of problem to the surface is always warranted and should be welcomed Any abnormalities revealed in the examination of the scores need to be made public so that the need for in depth analysis can be considered It is in that spirit that this paper presents some unusual patterns in the data for FCAT Reading at the middle school level

**Predicting FCAT Science Scores 2006-07. Research Brief** Terry Froman, Vilma Rubiera, 2006 Although students have been taking the Florida Comprehensive Assessment Test FCAT Science test for a few years the State has only recently set the achievement level standards for the Science test Science will be included in the school grade calculations for the first time in 2006 07 In addition although no official guidelines exist presently the FCAT Science scores will also be incorporated in the Adequate Yearly Progress requirements in the near future With the growing importance of the FCAT Science test it becomes increasingly desirable to have some way of predicting the performance of students In other FCAT testing areas prediction formulas and cutoff scores for success have been developed by this office and made available to schools for several years However because the FCAT Science test is relatively new and because it is administered in only Grades 5 8 and 11 prediction for this test must proceed along different lines This paper presents the results of an analysis directed toward predicting students Science scores based on their performance on the FCAT Mathematics test of the previous year

*Facing the FCAT* Francis P. O'Boyle, 2004 This research compared the effectiveness of efforts by the Palm Beach County School District and the Miami Dade County School District to raise academic achievement at 39 comparable low performing schools in their districts Palm Beach County School District mandated a highly prescriptive plan that involved intense district staff involvement during the 2003 2004 school year Miami Dade County School District utilized a highly descriptive plan that entailed only mild to moderate involvement from district staff A matched pair research design was used to examine what differences if any existed between the learning gains of comparable schools in Palm Beach County and Miami Dade County as measured by changes in mean developmental scale scores on the Reading and Math subtests of the Florida Comprehensive Assessment Test Using a two tailed test comparing the means of the two groups  $\alpha = .05$  there was no statistical significance in the mean changes in mean developmental scale scores MDSS in reading and no significant correlation between the schools in the matched pairs in either reading or math  $p = .05$  There was statistical significance  $t = 2.633$   $p = .012$  in the changes in mean developmental scale scores in math however and a test of effect size  $d = .69334$  indicated that

this was of moderate practical significance      Classroom Grades and Their Relationship to FCAT Scores. Research Brief Terry Froman, Shelly Brown, Arleti Tirado, 2008 The teacher's task of assigning letter grades to students and the public's interpretation of them can be perplexing Does the student's grade represent the level of achievement the gain in achievement or some combination of the two Is the student's effort included in the grade or are high achievers given good marks regardless of effort Are pupils marked according to their own potential learning ability or in relation to their classmates achievement There are no clear answers to these questions Despite attempts at precise directives practices tend to vary by school teacher and context Scores on an FCAT standardized test seem to be a different matter Such tests are designed to be criterion referenced intending to determine whether a student has mastered the material taught in a specific grade or course The apparent objectivity of the test and its connection to a specific curriculum gives the impression of a pure measure of student achievement But tests no matter how carefully designed are inevitably imperfect and measure only a sample of student behavior over a very short period of time What exactly do classroom grades represent in Miami Dade schools and what is their relationship to FCAT scores How is it that some students can get very high classroom grades and still score at below proficiency levels on the FCAT What should educators expect the relationship to be between classroom grades and FCAT scores These and other issues regarding grades and test scores are explored in this paper      **Predicting FCAT Science Scores 2007-08. Research Brief** Terry Froman, Vilma Rubiera, 2007 Although students have been taking the Florida Comprehensive Assessment Test FCAT Science test for a few years the State included the performance on the Science test in the school grade calculations for the first time in 2006-07 Although no official guidelines exist presently the Science scores may also be incorporated in the NCLB Adequately Yearly Progress requirements in the near future With the growing importance of the Science test it becomes increasingly desirable to have some way of predicting the performance of students In other FCAT testing areas prediction formulas and cutoff scores for success have been developed by this office and made available to schools for several years However because the Science test is relatively new and because it is administered in only Grades 5, 8, and 11 prediction for this test must proceed along different lines This paper presents the results of an analysis directed toward predicting students Science scores based on their performance on the FCAT Mathematics test of the previous year For the 2006-07 edition of this report see ED538076      *An Analysis of Student FCAT Outcomes and Teacher Assigned Letter Grades in Reading and Mathematics in a North Florida Urban Elementary School* Leanetta Cosby McNealy, 2003      A Comparison of SAT Scores of the LEP Elementary School Students in Duval County, Florida Kathryn Llewellyn Branch, University of North Florida.
