gender Using extensive survey data he shows that this process is driven mainly by values not fear and is only going to accelerate as culturally leftist generations enter the workforce and electorate Its rise suppresses the open debate that makes effective policy making possible harming the minorities cultural socialists purport to help Only if we shift from encouraging minority fragility to building minority resilience using state power to check institutional illiberalism can we resist cultural socialism and restore cultural flourishing This is the authoritative study of the radical shift in values that has turbo charged the culture wars of our time No one concerned with the cultural and political conflicts of our times can afford to miss it
