fewer than two hundred pages David Stove leaves the well established and widely regarded edifice of the academic philosophy of science in smoldering ruins This book provides a modern history of scientific reasoning from David Hume s inductive skepticism to Karl Popper s outright denial of induction to the increasingly irrational and absurd scientific views that followed When Popper untethered science from induction Stove argues he triggered a postmodernist nightmare of utter nonsense culminating in Paul Feyerabend s summation that anything goes when it comes to defining or describing science With undeniable logic a deft analysis of the linguistic slight of hand that make absurd arguments seem reasonable and regular displays of wit Stove gives the reader a front row seat to one of the greatest unforced errors in the history of modern thought Stove s views are entirely consistent with the origins of scientific inference and logic as well as modern advances in probability theory and yet he remains largely unnoticed by most of the academic world From Stove s insider outsider perspective the train wreck that is academically accepted philosophy of science and science studies is a fascinating and thoroughly entertaining subject of study Scientific Irrationalism is the perfect place to begin any examination of what science is and what it is not

Spicker, 2013-06-29 The concept health is ambiguous 18 9 11 The concept mental health is even more so Health compasses senses of well being wholeness and sound ness that mean more than the simple freedom from illness a fact appreciated in the World Health Organization s definition of health as more than the absence of disease or infirmity 7 The wide range of viewpoints of the contributors to this volume attests to the scope of issues placed under the rubric mental health These papers presented at the Fourth Symposium on Philosophy and Medicine were written and discussed within a broad context of interests concerning mental health Moreover in their diversity these papers point to the many descriptive evaluative and in fact performative functions of statements concerning mental health Before introducing the substance of these papers in any detail I want to indicate the profound commerce between philosophical and psychological ideas in theories of mental health and disease This will be done in part by a consideration of some conceptual developments in the history of psychiatry as well as through an analysis of some of the functions of the notions of mental illness and health Mental health lays a special stress on the wholeness of human intuition emotion thought and action
