Dispezio, 2010-07-02 What Brain Research Can Teach About Cutting School Budgets Karen D. Olsen, 2010-02-18 Karen Olsen has put budget topics into perspective so that school administrators can make decisions based on what is best for children not what is easiest and most efficient for adults This book is a powerful guide in helping our principals see through the fog of mandates policies and red tape and get to the priority of students Terri Patterson Director of Elementary Education Waco Independent School District TX This book boldly asserts that brain research should be applied wherever human brains are working Not only can and should brain research inform how and what we teach in the classroom it should be brought to bear in boardrooms and the school budgeting process as well Linda Jordan Associate Professor Hope College Make objective budget cutting decisions that will truly impact student achievement In tough economic environments budget cutting is a daunting but necessary task for many school administrators Karen D Olsen takes an exciting unique approach by applying brain research to budgeting Now educators can make the decision making process more objective by using analytical thinking in school budgeting rather than responding to emotion tradition or outside influences Providing a strategy builder chart this book Offers action items for putting the strategies into practice Helps leaders determine where money should be reinvested or reallocated Provides specific tips for working within a group decision making setting Includes more than 30 analytical charts to aid in gathering needed information What Brain Research Can Teach About Cutting School Budgets offers principals and district leaders a methodical process for taking subjectivity out of the budgeting process *Resources in Education*, 1998 *Kid's Eye View of Science* Susan Kovalik, Karen D. Olsen, 2010-09-08 Examines learning science from multiple perspectives including the child's perspective guides readers through the steps of igniting students natural sense of wonder incorporating brain research integrating science concepts with other subjects and applying science to daily life demonstrates how to teach science conceptually through the lens of big ideas such as change interdependence and adaptation **Handbook of Research on Barriers for Teaching 21st-Century Competencies and the Impact of Digitalization** Dhira, Harpreet Kaur, 2021-06-25 The need to develop 21st century competencies has received global recognition but instructional methods have not been reformed to include the

teaching of these skills Multiple frameworks include creativity critical thinking communication and collaboration as the foundational competencies Complexities of planning curriculum and delivering instruction to develop the foundational competencies requires professional training However despite training instructional practice can be impacted by barriers caused by personal views of teachers economic constraints access to resources social challenges pandemic overwhelming pace of global shifts and other influences With digitalization entering the field of education it is unclear if technology has helped in removing or eliminating the barriers or has itself become another obstruction in integrating the competencies Gaining an educator's perspective is essential to understanding the barriers as well as solutions to mitigate the impediments through innovative instructional methods being practiced across the globe via digital or non digital platforms The need for original contributions from educators exists in this area of barriers to 21st century education and the role of digitalization The Handbook of Research on Barriers for Teaching 21st Century Competencies and the Impact of Digitalization discusses teaching the 21st century competencies namely critical thinking creativity collaboration and communication This book presents both the problems or gaps causing barriers and brings forth practical solutions digital and non digital to meet the educational shifts The chapters will determine the specific barriers that exist whether political social economic or technological to integrating competencies and the methods or strategies that can eliminate these barriers through compatible instructional approaches Additionally the chapters provide knowledge on the impacts of digitalization in general on teaching and learning and how digital innovations are either beneficial to removing impediments for students or rather causing obstructions in integrating the four competencies This book is ideally intended for educators and administrators working directly with students educational researchers educational software developers policymakers teachers practitioners and students interested in how 21st century competencies can be taught while facing the impacts of digitalization on education
