Candida Vilarinho,Fernando Castro,Maria de Lurdes Lopes,2017-09-01 Wastes Solutions Treatments and Opportunities II

contains selected papers presented at the 4th edition of the International Conference Wastes Solutions Treatments and Opportunities that took place 25 26 September 2017 at the Faculty of Engineering of the University of Porto Portugal The Wastes conference which takes place biennially is a prime forum for academics and industry representatives from the waste management and recycling sectors around the world to share their experience and knowledge with all in attendance The published papers focus on a wide range of topics including Wastes as construction materials Wastes as fuels Waste treatment technologies MSW management Recycling of wastes and materials recovery Wastes from new materials nanomaterials electronics composites etc Environmental economic and social aspects in waste management and Circular economy *Current Trends and Future Developments on (Bio-) Membranes* Angelo Basile,Kamran

Ghasemzadeh,2021-12-04 *Current Trends and Future Developments on Bio Membranes* Techniques of Computational Fluid Dynamic CFD for Development of Membrane Technology provides updates on new progress in membrane processes due to various challenges and how many industrial companies and academic centers are carrying out these processes Chapters help readers understand techniques of computational fluid dynamic CFD for the development of membrane technology including an introduction to the technologies their applications and the advantages disadvantages of CFD modeling of various membrane processes In addition the book compares these modeling methods with other traditional separation systems and covers fouling and concentration polarization problems The book is a key reference for R D managers interested in the development of membrane technologies as well as academic researchers and postgraduate students working in the wider areas of strategic treatments separation and purification processes Includes developments of membrane technologies in different applications by using CFD tools Describes CFD methods for evaluation and optimization of membrane process performance Indicates CFD method advantages over other modeling strategies for the analysis of membrane membrane reactor processes **Membrane-Distillation in Desalination** Farid Benyahia,2019-05-30 *Membrane Distillation in*

*Desalination* is an attempt to provide the latest knowledge state of the art and demystify outstanding issues that delay the deployment of the technology on a large scale It includes new updates and comprehensive coverage of the fundamentals of membrane distillation technology and explains the energy advantage of membrane distillation for desalination when compared to traditional techniques such as thermal or reverse osmosis The book includes the latest pilot test results from around the world on membrane distillation desalination *Data Science and Big Data: An Environment of Computational Intelligence* Witold Pedrycz,Shyi-Ming Chen,2017-03-21 This book presents a comprehensive and up to date treatise of a

range of methodological and algorithmic issues It also discusses implementations and case studies identifies the best design practices and assesses data analytics business models and practices in industry health care administration and business Data science and big data go hand in hand and constitute a rapidly growing area of research and have attracted the attention of industry and business alike The area itself has opened up promising new directions of fundamental and applied research and

has led to interesting applications especially those addressing the immediate need to deal with large repositories of data and building tangible user centric models of relationships in data Data is the lifeblood of today s knowledge driven economy Numerous data science models are oriented towards end users and along with the regular requirements for accuracy which are present in any modeling come the requirements for ability to process huge and varying data sets as well as robustness interpretability and simplicity transparency Computational intelligence with its underlying methodologies and tools helps address data analytics needs The book is of interest to those researchers and practitioners involved in data science Internet engineering computational intelligence management operations research and knowledge based systems      *Renewable Resources for Surface Coatings, Inks and Adhesives* Rainer Höfer, 2022-11-11 Providing a detailed survey of renewable raw materials for paints inks and glues this book is ideal for researchers and practitioners working in the areas of green chemistry industrial chemistry and sustainability Beginning with a brief history of coatings and adhesives this book walks the reader through the chemistry properties sourcing and processing of a number of renewable raw materials including lipids natural resins proteins and carbohydrates Their use in a range of recent developments and concepts from material protection to decorative paints and coatings adhesives and sealants is highlighted providing the reader with a complete and modern foundation to the field      Cloud Computing Security John R. Vacca, 2016-09-19 This handbook offers a comprehensive overview of cloud computing security technology and implementation while exploring practical solutions to a wide range of cloud computing security issues With more organizations using cloud computing and cloud providers for data operations proper security in these and other potentially vulnerable areas have become a priority for organizations of all sizes across the globe Research efforts from both academia and industry in all security aspects related to cloud computing are gathered within one reference guide      **Comprehensive Membrane Science and Engineering** Enrico Drioli, Lidieta Giorno, Enrica Fontananova, 2017-07-20 Comprehensive Membrane Science and Engineering Second Edition Four Volume Set is an interdisciplinary and innovative reference work on membrane science and technology Written by leading researchers and industry professionals from a range of backgrounds chapters elaborate on recent and future developments in the field of membrane science and explore how the field has advanced since the previous edition published in 2010 Chapters are written by academics and practitioners across a variety of fields including chemistry chemical engineering material science physics biology and food science Each volume covers a wide spectrum of applications and advanced technologies such as new membrane materials e g thermally rearranged polymers polymers of intrinsic microporosity and new hydrophobic fluoropolymer and processes e g reverse electrodialysis membrane contractors membrane crystallization membrane condenser membrane dryers and membrane emulsifiers that have only recently proved their full potential for industrial application This work covers the latest advances in membrane science linking fundamental research with real life practical applications using specially selected case studies of medium and large scale membrane operations to demonstrate successes

and failures with a look to future developments in the field Contains comprehensive cutting edge coverage helping readers understand the latest theory Offers readers a variety of perspectives on how membrane science and engineering research can be best applied in practice across a range of industries Provides the theory behind the limits advantages future developments and failure expectations of local membrane operations in emerging countries *Pollutants and Recent Trends in Wastewater Treatment* Ali Müfit Bahadır, Andreas Haarstrick, Fatma Beduk, Senar Aydin, 2024-11-29 This book demonstrates the variability and extension of environmental pollutants in water and wastewater besides with recent technological developments in wastewater treatment It covers review articles and research studies written in a clear style that makes it informative for scientists researchers professionals and students This book provides a comprehensive overview of the current state of knowledge regarding source transport and fate of not only emerging compounds but also pollutants gaining importance over time such as pharmaceuticals microplastics and viruses It ensures to understand the dimension of the adverse effects on ecosystem and human health through various exposure pathway The book also covers recent trends in wastewater treatment with a focus on membrane technologies allowing to remove even very small concentrations of pollutants

**Blockchain and Artificial Intelligence-Based Solution to Enhance the Privacy in Digital Identity and IoT** Fehmi Jaafar, Schallum Pierre, 2023-10-17 The chapters in this book explore the main domains that represent considerable risks for the respect of privacy such as education health finance or social media Through its place in the massive data production industry the Internet of Things participates in the development of artificial intelligence and is increasingly attracting the attention of web giants governments and especially all types of hackers Thanks to this book private and public organizations will have at their disposal a tool that highlights on the one hand the major challenges raised by privacy in the context of the Internet of Things and on the other hand recommendations for improving good practices Digital identity is presented as a bulwark for the protection of privacy It opens up new avenues for improving digital trust Concretely there are a set of challenges that are associated with the management of digital identity mainly in relation to the compliance and governance of personnel data in order to eliminate privacy and security risks **Migration and**
