### Topic 1 - Biological Diversity and Survival

1. What does the term **biological diversity** refer to? *It refers to the number and variety of organisms found within a specified geographic region*
2. What is the difference between **abiotic** and **biotic**? *\*\* Please refer to your notes and/or textbook for this answer*
3. Explain the difference between **structural** and **behavioral** adaptations with examples of each.  
*Structural adaptations refer to a physical structure that allows the organism a better chance of survival. Example: Spikes, scales, fur, etc.*  
*Behavioral adaptations refer to a behavior that allows the organism a better chance of survival. Example: Migration, hibernation, etc.*
4. What is the value of **variation**? *Variation is the key to genetic diversity which helps contribute to the survival of living things by producing populations that have a lot of variation.*
5. Example: *If there was a particularly long cold winter, perhaps only those grizzlies with especially thick coats would survive the winter, but those with thinner coats might not.
