Rehabilitation Karen Whalley Hammell, 2006-02-22 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Occupational Therapy eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title The book provides an accessible introduction to many of the current theoretical perspectives on disability enabling readers to challenge the taken for granted nature of traditional knowledge and assumptions within the rehabilitation health and community care industries and encouraging a more critical approach both to the nature of rehabilitation following injury or illness and to the problem of physical difference and disability Through its interrogation and exploration of new theoretical perspectives on disability and rehabilitation this book provides a unique text for students and practitioners of nursing occupational therapy physiotherapy and social work and for educators and researchers in these fields Although rehabilitation practitioners claim to aspire to client centred practice and advocate participatory modes of research rehabilitation theory remains curiously estranged both from theoretical perspectives developed by disabled disability theorists and from critical perspectives on disability that are emerging from other academic disciplines Thus immune from alternate views rehabilitation practitioners fail to question the premise that their professional assumptions are correct or right Contemporary theorists raise important questions for example about professional power concepts of normality independence and the physical body issues central to rehabilitation as well as to the role of the cultural environment in producing prejudice the role of the social environment in creating disadvantage and to issues of power and privilege and of the systemic oppression of disabled people This book provides an introduction to the expanding body of critical work on disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner's approach to rehabilitation Relevant for all the rehabilitation and health care professions Advancing Precision Therapies in Glioblastoma Konstantinos

Gousias, Theophilos Tzaridis, Marika Broekman, 2025-06-17 Despite recent advances in diagnostic modalities and surgical techniques the prognosis of patients with glioblastoma remains still dramatically poor Even after successful resections the 1 year survival rates lie below 50% since the traditional systemic adjuvant therapy after surgery appears inefficient Poor prognosis has been associated with the unique challenges presented by the blood brain barrier BBB which hinders the

concentration of chemotherapeutic agents able to reach tumors and mitigates the effects of systemic delivery Therefore there is a need for alternative treatment approaches which overcome the BBB and have a lesser toxicity profile Several novel therapeutic strategies are currently being explored in early phase clinical trials for the treatment of glioblastoma including selective intra arterial or intra nasal approaches in addition to direct low and high pressure drug delivery in the tumor cavity or eloquent solid tumor Further targeted therapies leveraging nanoparticles and autologous vaccines appear as promising alternatives Other options focus on temporarily modifying the BBB such as using focused ultrasound or directly destroying tumor cells such as with photodynamic or thermal therapy

Introduction to Gender Jennifer Marchbank, Gayle Letherby, 2014-06-30 Thoroughly updated in this second edition Introduction to Gender offers an interdisciplinary approach to the main themes and debates in gender studies This comprehensive and contemporary text explores the idea of gender from the perspectives of history sociology social policy anthropology psychology politics pedagogy and geography and considers issues such as health and illness work family crime and violence and culture and media Throughout the text studies on masculinity are highlighted alongside essential feminist work producing an integrated investigation of the field Key features A thematic structure provides a clear exploration of each debate without losing sight of the interconnections between disciplines World in focus boxes and international case studies offer a broad global perspective on gender studies In text features and student exercises including Controversy A critical look and Stop and think boxes allow the reader to engage in the debates and revise the material covered Hotlinks throughout the text make connections between chapters allowing the reader to follow the path of particular issues and debates between topics and disciplines New to the second edition A new chapter explores gender through the discipline of philosophy A new section on international relations brings this relevant topic into focus Current discussion on the language of gender across Europe is brought in to Chapter 1 A focus on Europe and Scandinavia as well as the UK gives the text a broader scope Examples are updated throughout to ensure the text is cutting edge and relevant Introduction to Gender second edition is highly relevant to today's students across the social sciences and is an essential introduction for students of sociology women's studies and men's studies

PROBAMAT-21st Century: Probabilities and Materials G.N. Frantzikonis, 2012-12-06 There are numerous technological materials such as metals polymers ceramics concrete and many others that vary in properties and serviceability However the almost universal common theme to most real materials is that their properties depend on the scale at which the analysis or observation takes place and at each scale probabilities play an important role Here the word probabilities is used in a wider than the classical sense In order to increase the efficiency and serviceability of these materials researchers from NATO CP and other countries were brought together to exchange knowledge and develop avenues for progress and applications in the 21st century The workshop began by reviewing progress in the subject area over the past few years and by identifying key questions that remain open One point was how to observe measure material properties at different scales and whether a probabilistic

approach at each scale was always applicable and advantageous The wide range of materials from wood to advanced metals and from concrete to complex advanced composites and the diversity of applications e g fatigue fracture deformation etc were recognized as obstacles in identifying a universal approach The 'Contextual Elements' of the Crime of Genocide Nasour Koursami,2018-02-10 This book examines the position of contextual elements as a constitutive element of the legal definition of the crime of genocide and determines the extent to which an individual g nocidaire is required to act within a particular genocidal context Unlike other books in the field of the study of the crime of genocide this book captures the nuance and the complex issues of the debate by providing book length comprehensive examination of the position of contextual elements in light of the evolution of genocide as a concept and the literal legal definition of the crime of genocide which expressly characterized the crime with only the existence of an individualistic intent to destroy a group With scholars of international criminal law students researchers practitioners in the field and international criminal tribunals in mind the author tackles many of the issues raised on the position of contextual elements in both academic literature and judicial decisions Nasour Koursami is the Director of Applied Research and a Lecturer at the National School of Administration in Chad He studied law at Cardiff and Bristol Universities and holds a Ph D in International Law from the University of Edinburgh *Advances toward improved understanding and treatment of uncommon ovarian cancer types and subtypes* Robb Hollis,Mihaela Carmen Cristea ,Mignon Van Gent,2024-10-22 Ovarian cancer is an umbrella term for a collection of distinct disease entities histotypes Until now the majority of research has focussed on the most common histotype high grade serous ovarian carcinoma HGSOC which accounts for 70% of cases The less common histotypes including endometrioid clear cell mucinous low grade serous carcinosarcoma and non epithelial histotypes have received far less research attention Accordingly while major advances in our understanding of HGSOC have led to molecularly directed therapies that improve patient outcomes progress in less common histotypes has lagged behind Notably many of the uncommon histotypes demonstrate resistance to conventional chemotherapy regimens and their inherent biological differences suggest most are unlikely to respond to emerging molecular therapeutics designed to target the biology of common ovarian cancer types *American Men of Science* ,1968 **American Men and Women of Science** ,1968 Feminist Anthropology Pamela L. Geller,Miranda K. Stockett,2007-06-19 Feminist Anthropology probes critical issues in the study of gender sex and sexuality While feminist anthropology is often perceived as fragmented this vital new work establishes common ground and situates feminist inquiries within the larger context of social theory and anthropological practice Social Change And The Middle Classes Tim Butler,Mike Savage,2013-11-05 First Published in 1995 The study of the middle classes actually poses a variety of interesting challenges Traditionally the social scientific gaze has been directed either downwards to the working classes the poor and the dispossessed or upwards to the wealthy and powerful For all these reasons a collection of original papers on various aspects of the British middle classes seems an important venture that will cast valuable light on the course

of social change in Britain more generally This book is designed to bring together a series of accessible high quality research papers on various aspects of the British middle classes
