Polio An American Story:

Polio David M. Oshinsky, 2005-04-12 Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure from the March of Dimes to the discovery of the Salk and Sabin vaccines and beyond Drawing on newly available papers of Jonas Salk Albert Sabin and other key players Oshinsky paints a suspenseful portrait of the race for the cure weaving a dramatic tale centered on the furious rivalry between Salk and Sabin He also tells the story of Isabel Morgan perhaps the most talented of all polio researchers who might have beaten Salk to the prize if she had not retired to raise a family Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis which was founded in the 1930s by FDR and Basil O Connor it revolutionized fundraising and the perception of disease in America Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market and the way in which the legal system dealt with manufacturers liability for unsafe products Finally and perhaps most tellingly Oshinsky reveals that polio was never the raging epidemic portrayed by the media but in truth a relatively uncommon disease But in baby booming America increasingly suburban family oriented and hygiene obsessed the specter of polio like the specter of the atomic bomb soon became a cloud of terror over daily life Both a gripping scientific suspense story and a provocative social and cultural history *Polio* opens a fresh window onto postwar America *Polio* Thomas

Abraham, 2018-09-01 In 1988 the World Health Organization launched a twelve year campaign to wipe out polio Thirty years and several billion dollars over budget later the campaign grinds on vaccinating millions of children and hoping that each new year might see an end to the disease But success remains elusive against a surprisingly resilient virus an unexpectedly weak vaccine and the vagaries of global politics meeting with indifference from governments and populations alike How did an innocuous campaign to rid the world of a crippling disease become a hostage of geopolitics Why do parents refuse to vaccinate their children against polio And why have poorly paid door to door healthworkers been assassinated Thomas Abraham reports on the ground in search of answers

Rotary International and the Selling of American Capitalism Brendan Goff,2021-07-06 A new history of Rotary International shows how the organization reinforced capitalist values and cultural practices at home and tried to

remake the world in the idealized image of Main Street America Rotary International was born in Chicago in 1905 By the time World War II was over the organization had made good on its promise to girdle the globe Rotary International and the Selling of American Capitalism explores the meteoric rise of a local service club that brought missionary zeal to the spread of American style economics and civic ideals Brendan Goff traces Rotary s ideological roots to the business progressivism and cultural internationalism of the United States in the early twentieth century The key idea was that community service was intrinsic to a capitalist way of life The tone of service above self was often religious but as Rotary looked abroad it embraced Woodrow Wilson s secular message of collective security and international cooperation civic internationalism was the businessman s version of the Christian imperial civilizing mission performed outside the state apparatus The target of this mission was both domestic and global The Rotarian the organization s publication encouraged Americans to see the world as friendly to Main Street values and Rotary worked with US corporations to export those values Case studies of Rotary activities in Tokyo and Havana show the group paving the way for encroachments of US power economic political and cultural during the interwar years Rotary s evangelism on behalf of market friendly philanthropy and volunteerism reflected a genuine belief in peacemaking through the world s parliament of businessmen But as Goff makes clear Rotary also reinforced American power and interests demonstrating the tension at the core of US led internationalism

Doom Niall Ferguson,2021-05-04 All disasters are in some sense man made Setting the annus horribilis of 2020 in historical perspective Niall Ferguson explains why we are getting worse not better at handling disasters Disasters are inherently hard to predict Pandemics like earthquakes wildfires financial crises and wars are not normally distributed there is no cycle of history to help us anticipate the next catastrophe But when disaster strikes we ought to be better prepared than the Romans were when Vesuvius erupted or medieval Italians when the Black Death struck We have science on our side after all Yet in 2020 the responses of many developed countries including the United States to a new virus from China were badly bungled Why Why did only a few Asian countries learn the right lessons from SARS and MERS While populist leaders certainly performed poorly in the face of the COVID 19 pandemic Niall Ferguson argues that more profound pathologies were at work pathologies already visible in our responses to earlier disasters In books going back nearly twenty years including *Colossus* *The Great Degeneration* and *The Square and the Tower* Ferguson has studied the foibles of modern America from imperial hubris to bureaucratic sclerosis and online fragmentation Drawing from multiple disciplines including economics cliodynamics and network science *Doom* offers not just a history but a general theory of disasters showing why our ever more bureaucratic and complex systems are getting worse at handling them *Doom* is the lesson of history that this country indeed the West as a whole urgently needs to learn if we want to handle the next crisis better and to avoid the ultimate doom of irreversible decline

Through Middle Eastern Eyes Michael

Parker, 2024-02-26 Kenneth E Bailey was both a missionary and a New Testament scholar As a missionary first in Egypt and later in Lebanon Israel Palestine and Cyprus he experienced firsthand the life of traditional Middle Eastern villagers which led him to the conclusion that the village culture he witnessed in the twentieth century had hardly changed since the first century Consequently he was able to reinterpret Jesus's parables and life experiences through this traditional culture In a remarkable series of acclaimed books which include *The Cross and the Prodigal* *Jacob and the Prodigal* and *Jesus through Middle Eastern Eyes* Bailey showed that Jesus was the first mind of the New Testament who used story and metaphor to challenge the leaders of his day in ways often unappreciated by contemporary readers This biography explains the origins of Bailey's key ideas and recounts his often fraught missionary career one that included the austere and the sometimes harsh life in the simple villages of Upper Egypt the perils of life in Beirut during the Lebanese Civil War 1975 1990 and being evacuated four times during the military conflicts in the region that made possible his groundbreaking insights into the New Testament

The Sleeper Agent A. W. Finnegan, 2023-12-01

This book details out the esoteric history of biological warfare in a way that no other book has done based on only official records, documents, science, and medical journals, former intelligence officers, and more. The history of this war goes much deeper than any other book on the subject has presented based on understandings and studies of science that have been purposefully buried and obscured. The author collected and studied the work of one of history's most exceptional yet infamous pioneers in virology and immunology, a German scientist by the name of Dr. Erich Traub, for several years in the process of writing this book, a process which perhaps no one else has managed to undertake until now.
