Bertucci, 2014-11-24 How to strengthen both academic research and international policies by improving the connections between scholars and policymakers *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy Drawing on contributions from top international scholars with policy experience in the United States Europe Asia Canada and Latin America as well as senior policymakers throughout the Americas Abraham F Lowenthal and Mariano E Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality Many policymakers believe that scholars are absorbed in abstract and self referential debates and that they are primarily interested in crafting theories and impressing other scholars rather than developing solutions to pressing policy issues The contributors to this book confront this gap head on They do not deny the obstacles to fruitful interaction between scholars and policymakers but drawing on their own experience discuss how these obstacles can be and have been overcome They present case studies that illustrate how scholars have helped reduce income inequality promote democratic governance improve gender equity target international financial sanctions manage the Mexico U S border and enhance inter American cooperation These success stories are balanced by studies on why academic analysts have failed to achieve much positive impact on counternarcotics and citizen security policies The editors astute conclusion identifies best practices and provides concrete recommendations to government agencies international institutions nongovernmental organizations and funding sources as well as to senior university officials academic departments and centers think tanks established scholars junior faculty and graduate students Clearly written and thoughtfully organized this innovative book provides analytic insights and practical wisdom for those who want to understand how to build more effective connections between the worlds of thought and action

Beginning with an overview of Post Cold War literature, Kassab summarizes and evaluates influential Post Cold War texts to better understand scholarship's need to predict. First, he discusses the central importance of power in international relations and drives home the central focus of international structures linking findings to the broader structure-agent problem. He then reinterprets the purpose of theory, preferring explanatory theories to those that aim to predict outcomes. To understand the context by which political ideas were developed and followed as if they were political ideologies, Hanna Samir Kassab makes explicit the links between historicism and historiography, forwarding a new methodology for studying political science. Politicist analysis. Using simple jargon and defining terms where necessary, this succinct and enlightening text is required reading for all those interested in international politics. **The Oxford**

Secularisms in a Post-Secular Age Michael Rectenwald, Rochelle Almeida, George Levine, 2015-10-16. *Global Secularisms* addresses the state of and prospects for secularism globally. Drawing from multiple fields, it brings together theoretical discussion and empirical case studies that illustrate on the ground extant secularisms as they interact with various religious, political, social, and economic contexts. Its point of departure is the fact that secularism is plural and that various secularisms have developed in various contexts and from various traditions around the world. Secularism takes on different social meanings and political valences wherever it is expressed. The essays collected here provide numerous points of contact between empirical case studies and theoretical reflection. This multiplicity informs and challenges the conceptual theorization of secularism as a universal doctrine. Analyses of different regions enrich our understanding of the meanings of secularism, providing comparative range to our notions of secularity. Theoretical treatments help to inform our understanding of secularism in context, enabling readers to discern what is at stake in the various regional expressions of secularity globally. While the bulk of the essays are case-based research, the current thinking of leading theorists and scholars is also included.

Revisiting Metaphors in International Relations Theory Michael P. Marks, 2018-01-08 This book presents an analysis of how metaphors are essential elements in the study of international relations It acknowledges the fact that theory and practice in international relations often rest on common metaphorical concepts which have implications for the ways people around the world pursue their lives Because of the increased attention metaphors have received as integral elements in political discourse there is a need to investigate metaphorical concepts that are not neutral in their implications for understanding international relations Inasmuch as government policy is shaped by metaphorical concepts that originate in the academic realm and given that scholarly works are therefore partially involved in inspiring policy the author subjects a range of metaphors in international relations theory to critical interrogation

Bridging the Theory-Practice Divide in International Relations Daniel Maliniak, Susan Peterson, Ryan Powers, Michael J.
