writers Dyson offers new perspectives by displaying the quality of life in the classroom through children's talk drawings and writing. The theoretical framework presented here for understanding children's growth moves what is usually considered background to the foreground for study. Most works on children's writing stress that children must disembed or decontextualize their written texts from dependency on other symbolic media and other people. Dyson however shows that to develop as writers children's text must become progressively more embedded in the social affective and intellectual parts of their lives. The book also emphasizes the nature of the classroom rather than the home as a distinctive context for early literacy growth. Moreover the classroom is an urban one that includes children from diverse social and ethnic backgrounds. The classroom and children whose lives fill this book challenge current thinking about such critical issues as the developmental links between writing and other symbol systems, sequence and variability in early writing growth, the relationship between form and function in young children's writing and the development of literary language. This book is a must for early childhood educators, reading and language arts specialists and scholars/researchers in the field of literacy.
