

METALS AND NON-METALS

CHAPTER AT A GLANCE

1. Introduction : Pure substances have characteristics different from mixture. Pure substances can further be classified into elements and compounds. On the basis of properties of elements, they are classified as (i) Metals, (ii) Non-metals, (iii) Metalloids.

2. Metals : Metals show metallic lustre, are generally hard, malleable and ductile. They are good conductors of heat and electricity. The following activities prove the above points :
Activity 1. Perform an activity to show that metals possess lustre.

Materials required : Copper strip, blade, piece of cloth.

Procedure :

- (1) Take a copper strip which has remained exposed to moisture and atmosphere for a long time. It will have a greenish coating of copper oxide and copper carbonate.
- (2) Rub the strip with a blade patiently for about five minutes [Fig. 3.1].
- (3) Clean the surface with a clean piece of cloth.

Result : We shall find that the surface which was dull earlier becomes shining red-brown which is the colour of copper. The activity proves that metals have lustre. All metals have lustre but the colours might be different.

Activity 2. Perform an activity to show, some metals can be cut with a knife.

Materials required : Iron, copper, aluminium, sodium and magnesium, knife, pair of tongs, filter paper, watch glass.

Procedure :

- (1) Take small pieces of iron, copper, aluminium and magnesium.
- (2) Try to cut these metals with a sharp knife.
What do you observe ?
Pieces of iron, copper, aluminium are hard and very difficult to cut with knife while magnesium can be cut.
- (3) Now hold a piece of sodium metal with a pair of tongs.
- (4) Put it on watch glass and try to cut it with a knife.
What do you observe ?

We observe that sodium metal can be cut easily with a sharp knife.

Activity 3. Perform an activity to prove that metals are malleable (can be beaten into sheets) and ductile (can be drawn into wires).

Eisenhower, Science Advice, and the Nuclear Test-Ban Debate, 1945-1963 Benjamin P. Greene,2007 Based on extensive research in government archives and private papers this book analyzes the secret debate within the Eisenhower administration over the pursuit of a nuclear test ban agreement In contrast to much recent scholarship this study concludes that Eisenhower strongly desired to reach an accord with the Soviet Union and the United Kingdom to cease nuclear weapons testing For Eisenhower a test ban would ease Cold War tensions slow the nuclear arms race and build confidence toward disarmament however he faced continual resistance from his early scientific advisers most notably Lewis L Strauss and Edward Teller Extensive research into previously unavailable government archival sources and collections of private manuscripts reveals the manipulative acts of test ban opponents and other factors that inhibited Eisenhower s actions throughout his presidency Meticulously analyzed these sources underscore Eisenhower s dependence on the counsel of his science advisors such as Strauss James R Killian and George B Kistiakowsky to determine the course he pursued in regard to several components of his national security strategy In addition to its comprehensive analysis of the test ban debate this book makes important contributions to the scholarly literature assessing Eisenhower s leadership and his approach to arms control
