

Science Has Made Man's Life Quite Comfortable

Science has changed the face of the world. It has, of course, given many things that benefit man. But the evils that it has showered on man wash away the advantages. It has made man depend on machines, calculators and computers. A day may come when his physical and mental faculties may grow so weak that he may not be able to lift a bag or solve a simple equation. In the field of health services, it has given us life-saving drugs. But it has also given drugs like smack and heroin. Nuclear energy created by science has been much praised but the blast in Russia has exploded the myth.

Atom bombs created by scientists were thrown on Hiroshima and Nagasaki decades ago. The painful memory still lingers and millions of people are still ill. I apparently support science. Science has made all the things possible. REALLY.... without science we cannot imagine our lives. humans might have extincted long back if science had not been improved. so,i think it 's not a bane for the society. There is a misconception about science ,people think that it is the science which is responsible for the explosions as well as destruction.

But I think it is human brain which caused all this destruction. PEOPLE fought and had lost their lives before the improvement of science also. so, it is definetly a boon for the society. The greatest harm science has done is to the faith of man. God has become a nonentity. In the modern jungle of mental activities where would a desperate man go? Having lost faith, his intellectual activities lead him to suicide. A number of scientists meet this fate every year in India. By This we can conclude that Science has more Boons than Banes.
