Flexible Query Answering Systems Henning Christiansen,Mohand-Said Hacid,Troels Andreasen,Henrik Legind Larsen,2004-08-17

This volume constitutes the proceedings of the Sixth International Conference on Flexible Query Answering Systems FQAS 2004

held in Lyon France on June 24-26 2004 FQAS is the premier conference for researchers and practitioners concerned with the vital task of providing easy, flexible and intuitive access to information for every type of need. This multidisciplinary conference draws on several research areas including databases, information retrieval, knowledge representation, soft computing, multimedia and human computer interaction. With FQAS 2004, the FQAS conference series celebrated its tenth anniversary as it has been held every two years since 1994. The overall theme of the FQAS conferences is innovative query systems aimed at providing easy, flexible and intuitive access to information. Such systems are intended to facilitate retrieval from information repositories such as databases, libraries and the Web. These repositories are typically equipped with standard query systems that are often inadequate for users. The focus of FQAS is the development of query systems that are more expressive, informative, cooperative, productive and intuitive to use.

Fuzziness in Information Systems Miroslav Hudec, 2016-09-28. This book is an essential contribution to the description of fuzziness in information systems. Usually, users want to retrieve data or summarized information from a database and are interested in classifying it or building rule-based systems on it. But they are often not aware of the nature of this data and/or are unable to determine clear search criteria. The book examines theoretical and practical approaches to fuzziness in information systems based on statistical data related to territorial units. Chapter 1 discusses the theory of fuzzy sets and fuzzy logic to enable readers to understand the information presented in the book. Chapter 2 is devoted to flexible queries and includes issues like constructing fuzzy sets for query conditions and aggregation operators for commutative and non-commutative conditions, while Chapter 3 focuses on linguistic summaries. Chapter 4 presents fuzzy logic control architecture adjusted specifically for the aims of business and governmental agencies and shows fuzzy rules and procedures for solving inference tasks. Chapter 5 covers the fuzzification of classical relational databases with an emphasis on storing fuzzy data in classical relational databases in such a way that existing data and normal forms are not affected. This book also examines practical aspects of user-friendly interfaces for storing, updating, querying and summarizing. Lastly, Chapter 6 briefly discusses possible integration of fuzzy queries, summarization and inference related to crisp and fuzzy databases. The main target audience of the book is researchers and students working in the fields of data analysis.

database design and business intelligence As it does not go too deeply into the foundation and mathematical theory of fuzzy logic and relational algebra it is also of interest to advanced professionals developing tailored applications based on fuzzy sets
