Stuck in the Shallow End Jane Margolis, 2008-08-15 The number of African Americans and Latino as receiving undergraduate and advanced degrees in computer science is disproportionately low according to recent surveys And relatively few African American and Latino high school students receive the kind of institutional encouragement educational opportunities and preparation needed for them to choose computer science as a field of study

and profession In *Stuck in the Shallow End* Jane Margolis looks at the daily experiences of students and teachers in three Los Angeles public high schools an overcrowded urban high school a math and science magnet school and a well funded school in an affluent neighborhood She finds an insidious virtual segregation that maintains inequality Two of the three schools studied offer only low level how to keyboarding cutting and pasting introductory computing classes The third and wealthiest school offers advanced courses but very few students of color enroll in them The race gap in computer science Margolis finds is one example of the way students of color are denied a wide range of occupational and educational futures Margolis traces the interplay of school structures such factors as course offerings and student to counselor ratios and belief systems including teachers assumptions about their students and students assumptions about themselves *Stuck in the Shallow End* is a story of how inequality is reproduced in America and how students and teachers given the necessary tools can change the system

Saving the School Michael Brick,2013-07-30 In the race to save a failing public high school one principal finds that making the numbers is only the beginning Being principal of Reagan High in Austin Texas was no dream assignment Test scores were low dropout rates were high and poverty was endemic But when Anabel Garza took the job she started something no one expected Racing against a deadline just to make the numbers she set out to rebuild the kind of school that once unified neighborhoods across America By her side a basketball coach showed kids they could be winners a young science teacher showed them they could learn and a community rallied around a treasured institution In this powerful rejoinder to the prevailing winds of education policy Michael Brick takes readers inside the high pressure world of a school on the brink Paying overdue tribute to a vital American tradition the great American high school *Saving the School* exposes the flaws of a broken system but also tells an inspiring story of faith hope and perseverance *Dismantling Contemporary Deficit Thinking* Richard R. Valencia,2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning *Dismantling Contemporary Deficit Thinking* provides comprehensive critiques and anti deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking *Dismantling Contemporary Deficit Thinking* examines the ongoing social construction of deficit thinking in three aspects of current discourse the genetic pathology model the culture of poverty model and the at risk model in which poor students students of color and their families are pathologized and marginalized Richard R Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation s public schools Valencia also discusses a number of proactive anti deficit thinking suggestions from the fields of teacher education educational leadership and educational ethnography that are intended to provide a more equitable and democratic schooling for all students **Children's Books in Print** R R Bowker Publishing,Bowker,1999-12 **Books In**
