Ostlund, 1992 Grade level 1 2 3 4 5 6 e p i t **Teaching Science to Every Child** John Settlage, Sherry Southerland, 2012-04-23 Teaching

Science to Every Child provides timely and practical guidance about teaching science to all students. Particular emphasis is given to making science accessible to students who are typically pushed to the fringe especially students of color and English language learners. Central to this text is the idea that science can be viewed as a culture including specific methods of thinking particular ways of communicating and specialized kinds of tools. By using culture as a starting point and connecting it to effective instructional approaches, this text gives elementary and middle school science teachers a valuable framework to support the science learning of every student. Written in a conversational style, it treats readers as professional partners in efforts to address vital issues and implement classroom practices that will contribute to closing achievement gaps and advancing the science learning of all children. Features include Point Counterpoint essays that present contrasting perspectives on a variety of science education topics; explicit connections between National Science Education Standards and chapter content and chapter objectives; bulleted summaries; key terms; reflection and discussion questions. Additional resources are available on the updated and expanded Companion Website www.routledge.com/textbooks/9780415892582. Changes in the Second Edition: Three entirely new chapters: Integrated Process Skills; Learning and Teaching Assessment; Technological tools and resources embedded throughout each chapter. Increased attention to the role of theory as it relates to science teaching and learning. Expanded use of science process skills for upper elementary and middle school. Additional material about science notebooks. Provided by publisher.

Science Process Skills Tok Kheng Yeap, 2012

Assessments for the Science Process Skills of Inquiry Karen Ostlund, Sheryl Mercier, 2006. The hands-on student performance tasks in this book were developed from Sheryl Mercier and Karen Ostlund's efforts to document changes in student learning. Teachers of primary students who use these performance assessments will be able to observe and record information regarding student ability to use science process skills. Repeated use of these performance tasks by a teacher will capture change in a student's science process skill acquisition over time. Our intent was to create assessment tools that would document change in the ability to use the science process skills of inquiry that may be incremental and not easily captured by one administration of a paper and pencil instrument. Finally, the performance task assessments we developed require few changes to the existing science curriculum for a primary teacher or school. That is, we do not want teachers to think that their curriculum must change to address the items on our assessments. Rather, we want teachers using the assessments to decide if the items on our performance tasks caused any changes in student learning. The book contains:

1. 33 developmentally appropriate hands-on performance assessments for the science process skills of inquiry levels 1, 2, and 3.
2. Complete instructions and rubrics for assessing the major process skills of inquiry.
3. Engaging original illustrated student recording sheets for each activity.
4. Blackline reproducible masters.
5. Using hands-on activities to assess the process skills of observing, communicating, estimating, measuring, collecting data, classifying, inferring, predicting, making models, interpreting data, making graphs, hypothesizing, defining, operationally controlling variables, and investigating.

The conception, incubation and delivery of any national development policy as well as the reform and implementation of extant policies are driven by the quality of teachers and their products within a functional educational system. Indeed, national and global models of development including the millennium development goals revolve around the frames of quality education beginning with teacher education. It is therefore important to have functional teacher education systems in Africa to help its citizens explore the networking of the world as a global village. This is achievable through a systematic mobilization of national resources and visible commitment to the development of a modernized cadre of scientific and technological manpower. This book *Teacher Education Systems in Africa in the Digital Era* is a rich exposition of theories and praxes essential for the development of teacher education in Africa. The book has immense benefits for teachers, teacher trainers, funding agencies, other stakeholders and policy makers.
