Oracle R12 Inventory Setup User Guide:

A Practical Guide to Implement Oracle E-Business Suite Anant Porwal, 2016-09-26 Planning, executing and controlling the implementation process for Oracle E Business Suite is no easy task but done right can do wonders for your business. Anant Porwal, a certified master in Oracle Financials with twenty years of experience helping businesses implement the suite of applications, provides a comprehensive blueprint to get the most value out of the product with this implementation guide. The first section highlights high-level features of core Oracle E Business Suite applications, including various technology pieces. It also explains how the applications allow for flexibility in accounting and in processing transactions. The second section explores how to implement the suite of applications from identifying the goals you want to achieve, selecting and building an implementation team, designing an implementation process, documenting and tracking progress, and taking the necessary steps to ensure implementation is a success. *A Practical Guide to Implement Oracle E Business Suite* is a must read for all members of companies planning Oracle implementation, including stakeholders, project managers, team members, and consultants alike. It provides insight into the intricacies and efforts for implementing very complex packages of Oracle E Business Suite.

Oracle e-Business Consultancy Handbook John Priestley, 2012-04-01 This book is based on my experiences as a consultant over a period of thirteen years, the first four of them working for Oracle. In those years, I had the titles Manufacturing and Financials Consultant on different sites. The essays in this book are largely designed to cover the more complex areas of the system, including intercompany and internal sales orders, outside processing, and consignment stock. They also cover procedures which may be needed in every factory, how to check stock or how to investigate stock losses. The SQL scripts give easy-to-use reports which can be downloaded into Excel. So many Oracle reports are difficult to use, especially where there is a lot of data. The SQL scripts also deal with the problems which occur after a site has gone live, such as clearing up ahead of the inventory month-end. Some queries, notably in BOM and Routing, validate data.

[Using Oracle 11i](#) Jim Crum, BOSS Corporation, 2002 Annotation This must have reference for users and implementers of Oracle Release 11i. This book provides the critical information required to configure and operate the Release 11i applications in one book. Several readers have told us they saved tens of thousands of dollars after reading the previous edition of this book. Special Edition [Using Oracle 11i](#) has about 40% new content over the previous version, including a new projects chapter, a new order management chapter, screen shots, tips, and Release 11i specific material. This book is the most complete reference available for the latest release of the Oracle financial, manufacturing, HRMS, and projects applications. Part 1 introduces the Oracle ERP applications and Release 11i concepts. Part 2 educates the reader on proven techniques for implementing these complex and integrated systems. Part 3 discusses configuration and usage of each of the financial, distribution, manufacturing, HRMS, and project applications. Part 4 discusses working with Oracle Support, consulting firms, and compatible software vendors. The appendixes review the employment market, consulting opportunities, and provide the reader with an implementation checklist.

All of Release 11i's new features are covered in depth and in practical terms. Not only will readers understand Oracle's new capabilities, they will be able to apply them right away. The authors are highly respected consultants from BOSS Corporation. They have worked with the Oracle Applications for over eight years since Release 9. Each chapter is written and edited by an expert consultant on that topic. The authors have published many white papers and newsletters about the Oracle Applications. BOSS Corporation is an active sponsor of the Oracle Applications User Group (OAUG). The authors have attended the last 14 national conferences, presented more than a dozen white papers at OAUG conferences, participated in the vendor exhibit hall, identified key words for white paper classification, and edited articles that are included in OAUG publications.
