Burroughs Gerald Alva (Al) Miller,2020-02-05 Through critical readings Gerald Alva Miller Jr examines the life of William S Burroughs and the evolution of his various radical styles not just in writing but also in audio film and painting Although Burroughs remains tied to the Beat Generation his works prove more revolutionary Miller argues that Burroughs more than any other author ushered in the era of both postmodern fiction and poststructural philosophy Through this study Miller situates Burroughs within the larger countercultural movements that began in the 1950s when his novels became influential because of their examination of various control systems from sex and drugs to global or even intergalactic conspiracies Understanding William S Burroughs begins by considering his early straightforward narratives Despite being more stylistically conventional they broke new ground with their depictions of junkies gay people and others marginalized by society The publication of Naked Lunch shattered all literary paradigms in terms of form and content Naked Lunch and the cut up novels recordings films and art that followed constitute one of the twentieth century s most sustained and methodical aesthetic experiments placing Burroughs alongside Franz Kafka Jorge Luis Borges James Joyce Samuel Beckett Vladimir Nabokov and Thomas Pynchon in terms of both innovation and influence Burroughs eventually turned his attention toward imagining methods of using the control machinery against itself Often considered his masterpiece the Red Night Trilogy of the 1980s ranges across time and space and life and death in its quest to discover the ultimate form of freedom His antiestablishment stance and virulent attacks on various types of oppression have caused Burroughs to remain a highly influential figure to each new generation of authors artists musicians and philosophers The hippies punks and cyberpunks were all heavily indebted to the man whom many people called el hombre invisible and his works prove more relevant than ever in the twenty first century *The Science Fiction Handbook* Nick Hubble,Aris Mousoutzanis,2013-11-28 As we move through the 21st century the importance of science fiction to the study of English Literature is becoming increasingly apparent The Science Fiction Handbook provides a comprehensive guide to the genre and how to study it for students new to

the field In particular it provides detailed entries on major writers in the SF field who might be encountered on university level English Literature courses ranging from H G Wells and Philip K Dick to Doris Lessing and Geoff Ryman Other features include an historical timeline sections on key writers critics and critical terms and case studies of both literary and critical works In the later sections of the book the changing nature of the science fiction canon and its growing role in relation to the wider categories of English Literature are discussed in depth introducing the reader to the latest critical thinking on the field

The History of Continental Philosophy Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike

The Cambridge Companion to Postmodern American Fiction Paula Geyh, 2017-04-24 This Companion is an authoritative comprehensive and accessible guide to the key works genres and movements of postmodern American fiction *The Metamorphoses of Myth in Fiction since 1960* Kathryn Hume, 2020-02-20 Why do contemporary writers use myths from ancient Greece and Rome Pharaonic Egypt the Viking north Africa's west coast and Hebrew and Christian traditions What do these stories from premodern cultures have to offer us The Metamorphoses of Myth in Fiction since 1960 examines how myth has shaped writings by Kathy Acker Margaret Atwood William S Burroughs A S Byatt Neil Gaiman Norman Mailer Toni Morrison Thomas Pynchon Kurt Vonnegut Jeanette Winterson and others and contrasts such canonical texts with fantasy speculative fiction post singularity fiction pornography horror and graphic narratives These artistic practices produce a feeling of meaning that doesn't need to be defined in scientific or materialist terms Myth provides a sense of rightness a recognition of matching a pattern a feeling of something missing a feeling of connection It not only allows poetic density but

also manipulates our moral judgments or at least stimulates us to exercise them Working across genres populations and critical perspectives Kathryn Hume elicits an understanding of the current uses of mythology in fiction Rock & Roll Generation Time-Life Books,1998 300 pictures and countless quotations bringing back the hopes fear and dreams of a one of a kind generation the nifty 50s *Emergencies of the Orbit and Adnexa* Bipasha Mukherjee,Hunter Yuen,2016-12-15 This handbook on orbital lacrimal and eyelid emergencies deals with such situations in a practical manner guiding the ophthalmologists in accurate handling and making them more proficient and confident in managing vision and life threatening emergencies With 51 chapters and more than 350 images this book covers all the eye emergencies that generalist and specialist ophthalmologists can expect to come across in their day to day practices It can be argued that the orbit can no more be called Pandora s Box because of the unpredictable nature of its contents This perception has changed over the years due to the advent of improved diagnostic in particular imaging techniques However since medical residency provides very little exposure to orbital and adnexal disorders most clinicians are inexperienced and unsure about their management Facing an emergency situation where improper management can rapidly worsen the condition leading to blindness or even death of the patient is every ophthalmologist s nightmare The emergent nature of these conditions does not always provide for a leeway to refer these patients to an orbit and oculoplasty specialist who are few and far between By the time the patient reaches his destination his vision maybe irrevocably lost The legal implications of such mismanagement can be significant too This book is a quick and essential resource to manage and refer eye emergencies with confidence *The Orbit, An Issue of Oral and Maxillofacial Surgery Clinics* Stephen A. Whitmarsh,2023-04-11 Mid twentieth century developments in science and technology produced new understandings and images of the planet that circulated the globe giving rise to a modern ecological consciousness but they also contributed to accelerating crises in the global environment including climate change pollution and waste In this new work Patrick Whitmarsh analyzes postwar narrative fictions that describe depict or express the earth from above the aerial and below the subterranean revealing the ways that literature has engaged this history of vertical science and linked it to increasing environmental precarity up to and including the extinction of humankind Whitmarsh examines works by writers such as Don DeLillo Karen Tei Yamashita Reza Negarestani and Colson Whitehead alongside postwar scientific programs including the Space Race atmospheric and underground nuclear testing and geological expeditions such as Project Mohole which attempted to drill to the earth's mantle As Whitmarsh argues by focusing readers attention on the fragility of postwar life through a vertical lens Anthropocene fiction highlights the interconnections between human behavior and planetary change These fictions situate industrial history within the much longer narrative of geological time and reframe scientific progress as a story through which humankind writes itself out of existence **An Informal History of the Hugos** Jo

likewise every written fiction relies on the construction of a context in which a story can take place This collection of essays explores what happens when fiction experimental writing and criticism are combined and applied to architectural projects and problems It begins with ficto criticism an experimental and often feminist mode of writing which fuses the forms and genres of essay critique and story and extends it into the domain of architecture challenging assumptions about our contemporary social and political realities and placing architecture in contact with such disciplines as cultural studies literary theory and ethnography These sixteen newly written pieces have been selected for this volume to show how ficto critical writing can be a powerful vehicle for creative architectural practice providing new opportunities to explore modes of writing about architecture both within and beyond the discipline The collection represents a broad range of geographical and cultural positions including indigenous and non Western contexts and includes a foreword and afterword by important thinkers in the domains of architectural criticism Jane Rendell and cultural studies ethnography Stephen Muecke
