The Electronic Design Automation Handbook carefully details design tools and techniques for high performance ASIC design. It shows the best practices for creating reusable designs in an SoC design methodology. The Electronic Design Automation Handbook was developed by colleagues from the Universities of Applied Sciences Germany who are engaged in the design of integrated electronics in education and research and which form the MPC Group of the Universities of Applied Sciences of Baden Württemberg Germany. MPC works as network of partners to industry and is able due to the wide varying experiences of the institutes involved to cover the entire range of the modern day circuit design. Each year more than 600 students are educated in the laboratories of MPC members. Our personal experience from student and industry projects ensures authenticity. The practical and theoretical experience from our projects has been used in the basis of this handbook.
