Web Search: Public Searching of the Web Amanda Spink, Bernard J. Jansen, 2006-02-21 This book brings together results from the Web search studies we conducted from 1997 through 2004. The aim of our studies has been twofold: to examine how the public at large searches the Web and to highlight trends in public Web searching. The eight year period from 1997 to 2004 saw the beginnings and maturity of public Web searching. Commercial Web search engines have come and gone or endured through the fall of the dot com companies. We saw the rise and in some cases the demise of several high profile publicly available Web search engines. The study of the Web search is an exciting and important area of interdisciplinary research. Our book provides a valuable insight into the growth and development of human interaction with Web search engines. In this book, our focus is on the human aspect of the interaction between user and Web search engine. We do not investigate the Web search engines themselves or their constantly changing interfaces, algorithms, and features. We focus on exploring the cognitive and user aspects of public Web searching in the aggregate. We use a variety of quantitative and qualitative methods within the overall methodology known as transaction log analysis.

Advanced Web Metrics with Google Analytics Brian Clifton, 2012-03-30 This book is intended for use by customers using Google Classic Analytics and does not cover the newer Google Universal Analytics or related Google Tag Manager. Google Analytics is the free tool used by millions of web site owners to assess the effectiveness of their efforts. Its revised interface and new features will offer even more ways to increase the value of your web site, and this book will teach you how to use each one to best advantage. Featuring new content based on reader and client requests, the book helps you implement new methods and concepts, track social and mobile visitors, use the new multichannel funnel reporting features, understand which filters to use, and much more. Gets you up and running with all the new tools in the revamped Google Analytics and includes content requested by readers and users, especially for new GA users. Covers social media analytics features, advanced segmentation, displays multi dashboard configurations, and using Top 20 reports. Provides a detailed best practices implementation guide covering advanced topics such as how to set up GA to track dynamic web pages, banners, outgoing links, and contact forms. Includes case studies and demonstrates how to optimize pay per click accounts, integrate AdSense, work with new reports and reporting tools, use ad version testing, and more. Make your web site a more effective business tool with the detailed information and advice about Google Analytics in *Advanced Web Metrics with Google Analytics*, 3rd Edition.

Computer-Assisted Reporting Brant Houston, 2014-11-21 This straightforward and effective how-to guide provides the basics for any journalist or student beginning to use data for news stories. It has step-by-step instructions on how to do basic data analysis in journalism while addressing why these digital tools should be an integral part of reporting in the 21st century. The book pays particular attention to the need for accuracy in computer-assisted reporting and to both the potential and pitfalls in utilizing large datasets in journalism. An ideal core text for courses on data-driven journalism or computer-assisted reporting. Houston

pushes back on current trends by helping current and future journalists become more accountable for the accuracy and relevance of the data they acquire and share Online instructor s materials are available to adopting professors and additional exercises are available free online to students at the below address <http://ire.org/carbook> username carbook password carbook4
