Abstract

Investigative dissection of a dead body primarily to find out cause of death is known as post mortem examination or Necropsy. Medicolegal autopsy or Forensic autopsy is performed following instructions of legal authority in sudden, suspicious, obscure, unnatural or criminal deaths. Autopsies are of two types i.e. Medico legal autopsy and Pathological or Hospital autopsy. Traditional procedures of autopsy need extensive dissection, which lead to mutilation of the dead body. As such, it has been unpopular amongst various religions and communities. To overcome this, many other variants of autopsies have developed over the years. Though many consider the autopsy to be an antiquated procedure, many changes have already occurred in the procedure. This paper attempts to explain various types of autopsies, the changing trends and analyses the advantages and disadvantages associated with them.

Key words: Digital autopsy; needle autopsy; molecular autopsy; endoscopic autopsy.

Introduction

Postmortem examination is a statutory requirement in all sudden, violent, unexplained, suspicious and litigious deaths. A meticulous autopsy includes external examination, internal examination that includes both gross and histopathological examination and / or toxicological examination. A properly conducted autopsy aided by modern methods is not only an essential part of an undergraduate and postgraduate teaching programme but also plays an important role in investigation of both natural and unnatural deaths.

Autopsy is a general term, which is derived from the word "autopsia", meaning is to see for oneself. The

word autopsy is used to denote a scientific postmortem examination of the deceased to determine cause and manner of death. Autopsies are of two types i.e. Medico legal autopsy and pathological autopsy. The most essential features of medico legal autopsy are that it must be proper and complete. Apart from determining cause of death (which may be the simplest, least controversial part of investigation) the Pathologist must be able to recognise, interpret and preserve evidence, whereas in hospital autopsy, it can be limited where the primary objective is to determine cause and mechanism of death. Procedure of autopsy is often found to be crude, involves mutilation of the body and unpopular amongst many religions. With passage of time various
