

CRIMINOLOGY PERSONAL STATEMENT

Crime plagues all countries on earth – from towering, modern cities to small rural villages. For as long as civilization has existed, there have been examples of crime, or humans going against the ordinance of the community. Part of this stems from psychological and biological factors, but there are many aspects of anthropology and sociology that are paramount to understanding the development of both crimes and criminals themselves. I first became interested in criminology through watching CSI with my mother as a third grade student. I found the motives behind each crime to be fascinating, and I was very interested in the psychology of crimes. It is a passion that I have taken into my studies in college, and I hope that a graduate degree in Criminology will allow me to delve even deeper to the field and enable me to change the legal system for the better.

Growing up, I possessed the usual dichotomy of thought regarding people – there were bad people in jail, and generally everyone on the outside could be considered good. However, the summer of my junior year, I volunteered to teach math at a correctional facility, and it opened up my mind to new ways to thinking about the ones that society labels “criminals”. It made me reflect about the truth behind the term “correctional facility” – were the resources and the hierarchy of society really enough to rehabilitate these individuals and prepare them for reentry? I didn’t think so, and over the next year, I started my own organization on campus that connected college students with correctional facilities where they could tutor and inspire residents of those facilities to aspire to higher education upon release.

My goal is to use the skills and knowledge I will gain from this graduate program in Criminology to understand the psychological and social constructs which contribute to crime statistics on both a micro and macro level, and to use this knowledge to improve policy. I want to focus on the socioeconomic and demographic stratifications that have a higher tendency towards crime, and develop policy to target specific aspects of their situation that contribute to crime. This degree will enhance not only my ability to do research and integrate knowledge, but will improve my communication and critical thinking skills to prepare me for a future career as a lawmaker.
