

Chapter 21 – Fundamental Tax Reform: Taxes on Consumption and Wealth

1. a. The income tax is 50 percent, so Zach pays $50\% \times \$10,000 = \$5,000$ in income taxes in the first period. In the second period, he earns \$500 in interest (10% of savings = $10\% \times \$5,000 = \500), so he pays taxes on interest of $50\% \times \$500 = \250 . The present value of Zach's lifetime tax payments equals $\$5,000 + [\$250/(1.1)] = \$5,227.27$.
- b. In the second period, Zach has savings and interest equal to \$5,500. He can consume \$3,667 in period 2 and must then pay $50\% \times \$3,667 = \$1,833.50$ in consumption taxes. The present value of Zach's lifetime tax payments is then equal to $\$5,000 + [\$1,833.50/(1.1)] = \$6,667$.

These calculations demonstrate the transitional problem in moving to a consumption tax because Zach had to pay high taxes during period 1 when he earned most of his income, and then had to pay high taxes during period 2 when he did his consuming.

2. The burden of the estate tax includes the resources used in estate planning and the effects of estate planning. Many families may alter their behavior in reaction to the estate tax and, if this results in less efficiency, the estate tax creates an excess burden that is not reflected by the number of taxable estates or the amount of tax revenue collected.
3. There is a fundamental confusion here. There is no reason to assume that the incidence of a general consumption tax (a VAT) will be the same as the incidence of a partial factor tax (corporate income tax).
4. a. For a fan giving a million-dollar ball to McGwire or Sosa, there would be a federal gift tax liability. Depending on the fan's circumstances, it could reach \$150,000 or more. The person receiving the gift owes no tax.
- b. If the fan keeps the ball, the fan would owe no tax now. But the ball would become part of his or her estate, taxable after death under the estate tax.
- c. The fan can avoid tax entirely by giving the ball to a charity, since he could entirely deduct the value of the ball from his taxable income. The charity could sell the ball; the proceeds from the sale would not be taxed.
- d. If the fan sells the ball, the fan owes tax on the net proceeds, just as the seller of any property would. The transaction would put the fan in the highest tax bracket, so that the marginal tax rate on the proceeds would be 39.6 percent.
- e. If the fan holds onto the ball for a year, it becomes a long-term capital asset, subject to the maximum capital-gains tax rate of 28 percent. Unless the fan thinks that there is going to be a substantial drop in the market value of the ball, he or she should hold onto it for a year.
