Routledge Handbook Of The Economics Of Knowledge:

Routledge Handbook of the Economics of Knowledge Cristiano Antonelli, Albert Link, 2014-12-05 The Routledge Handbook of the Economics of Knowledge provides a comprehensive framework to integrate the advancements over the last 20 years in the analysis of technological knowledge as an economic good and in the static and dynamic characteristics of its generation process There is a growing consensus in the field of economics that knowledge technological knowledge in particular is one of the most relevant resources of wealth yet it is one of the most difficult and complex activities to understand or even to conceptualize The economics of knowledge is an emerging field that explores the generation exploitation and dissemination of technological knowledge Technological knowledge cannot any longer be regarded as a homogenous good that stems from standardized generation processes Quite the opposite technological knowledge appears more and more to be a basket of heterogeneous items resources and even experiences All of these sources which are both internal and external to the firm are complementary as is the interplay between a bottom up and top down generation processes In this context the interactions between the public research system private research laboratories and various networks of learning processes within and among firms play a major role in the creation of technological knowledge In this Handbook special attention is given to the relationship among technological knowledge and both upstream scientific knowledge and related downstream resources By addressing the antecedents and consequences of technological knowledge from both an upstream and downstream perspective this Handbook will become an indispensable tool for scholars and practitioners aiming to master the generation and the use of technological knowledge

Transportation, Knowledge and Space in Urban and Regional Economics Kakuya

Matsushima, William P. Anderson, 2018-04-27 This collection of 16 original research chapters by international scholars addresses the complementary roles of transportation and knowledge and their spatial manifestations in modern urban and regional economies The authors provide research from North America Europe and Asia While the studies employ sophisticated methods and theory there is a strong element of practical applications and policy implications in each chapter as well This book will be of interest to communities of research and practice in urban and regional economics and planning regional science and economic geography transportation research planning and management and the knowledge economy

A Critical Mind Christine Godt, Matthias Lamping, 2023-06-22 This book traces the academic footprint of Hanns Ullrich Thirty contributions revolve around five central topics of his oeuvre the European legal order competition law intellectual property the regulation of new technologies and the global market order Acknowledging him as a trailblazer the book aims to capture how deeply Hanns Ullrich has influenced contemporaries and subsequent generations of scholars The contributors reiterate the path breaking patterns of his teachings such as his contemplation of intellectual property as embedded in competition the necessity of balancing private and public interests in intellectual property law the policies of market integration and the peculiar relationship of technological advancement and protectionism *The Evolutionary Complexity of Endogenous Innovation* Cristiano Antonelli, The notion of endogenous innovation as the outcome of the creative response of firms to out of equilibrium conditions is the cornerstone of the new evolutionary complexity This book elaborates and applies the theoretical framework established in the author's previous work *Endogenous Innovation The Economics of an Emergent System Property* This volume carefully explores the role of the reactivity of firms to out of equilibrium conditions It also examines the quality of knowledge governance mechanisms in assessing the levels of externalities that define the likelihood of creative responses as an alternative to adaptive responses *A Modern Guide to Knowledge* Francisco J.

Carrillo, 2022-11-18 Outlining an integrative theory of knowledge Francisco Javier Carrillo explores how to understand the underlying behavioural basis of the knowledge economy and society Chapters highlight the notion that unless a knowledge based value creation and distribution paradigm is globally adopted the possibilities for integration between a sustainable biosphere and a viable economy are small **Sources of Knowledge and Entrepreneurial Behavior** David B.

Audretsch, Albert N. Link, 2019-01-01 *Sources of Knowledge and Entrepreneurial Behavior* delves into the nature and importance of the relationship between sources of knowledge and entrepreneurial behavior and should be of interest to both academics and policy makers David B Audretsch and Albert N Link use the Knowledge Spillover Theory of Entrepreneurship as the conceptual foundation for why individuals decide to become entrepreneurs Then using a database of more than 4 000 small and relatively new European companies from 10 different countries called the AEGIS database Audretsch and Link offer new insights about the relationship between knowledge sources and entrepreneurial behavior In their analysis of the empirical evidence in support of the Knowledge Spillover Theory of Entrepreneurship Audretsch and Link conclude that

there is no singular source of knowledge driving entrepreneurship but a plethora of knowledge sources each associated with different dimensions of entrepreneurial activity The intellectual breakthrough in this book is not that knowledge matters or that it especially matters for entrepreneurship Rather Audretsch and Link show that knowledge and especially entrepreneurial knowledge is not a homogeneous phenomenon There are multiple sources of knowledge that act on entrepreneurial performance in a myriad of ways **Making Sense of the Learning Turn** Anders Örtengren, 2024-05-09

From learning toy and learning society to learning city and learning organization what is meant by learning The main focus of this volume is to increase our understanding of the learning turn referring in this book to the frequent occurrence and usage of terms in the last few decades where the word learning is the premodifier The authors also offer insights into the use of the word learning as a premodifier in the future and discuss what if anything may replace it such as knowledge as in knowledge management and smart as in smart city An extensive range of academic disciplines are covered including political science economics human geography philosophy linguistics higher education working life science management and organization and marketing While a single overall unified conclusion is not provided Making Sense of the Learning Turn presents a variety of voices and perspectives Some contributors are critical towards the learning turn explaining it in terms of fashion following manipulation and seduction Others interpret the learning turn more lightly or suggest a more collective form of learning as an alternative to the individualization of learning that some authors argue has been the case thus far *From Industrial*

Organization to Entrepreneurship Erik E. Lehmann, Max Keilbach, 2019-10-04 This book celebrates the contributions of David B Audretsch Distinguished Professor at the School of Public and Environment Affairs SPEA at Indiana University USA co founder and co editor of Small Business Economics and former Director of the Entrepreneurship Growth and Public Policy Group at the erstwhile Max Planck Institute of Economics Jena Germany For his pioneering work which explores the links between entrepreneurship government policy innovation economic development and global competitiveness he has received the 2001 Global Award for Entrepreneurship Research from the Swedish Foundation for Small Business Research and the 2011 Schumpeter Prize from the University of Wuppertal Germany This volume features original contributions from over 50 leading scholars to map analyze and evaluate the impact of Audretsch's research on a broad spectrum of research fields ranging from economics to entrepreneurship and geography The development and evolution of key ideas which have significantly shaped theory and future research across these fields are also explored Endogenous Innovation Cristiano

Antonelli, This ground breaking new book builds upon the Schumpeterian creative response The author shows that firms in out of equilibrium conditions try and react by means of introducing innovations The success of their reaction is contingent upon their access conditions to knowledge which are shaped by the system in which they operate The emergence of new innovations can in turn knock firms further out of equilibrium and cause changes in the system properties that govern their access to external knowledge This path dependent loop of interactions between the system properties and the individual

actions of firms accounts for endogenous innovation and the dynamics of the system

Degrowth through Knowledge-Based Development

Francisco Javier Carrillo, 2025-05-15 This book tackles the terms under which a knowledge based society can indefinitely improve while pursuing an eco economic steady state In doing so it addresses the literature gap on continued social improvement within a post growth economic and cultural paradigm Carrillo consolidates research on the Degrowth paradigm and proposes a conceptual framework for continued social improvement based on the integration of tangible and intangible collective values He proposes a method that accounts for effective social value through capital systems valuation and development and includes this operational metric system as an alternative to the metric of Gross National Product GNP The book critically examines the challenges of identifying a complete and consistent representation of total social value The book also includes a

series of knowledge based development programmes in cities and regions around the world and discusses policies and practices for urban mitigation and adaptation to the Anthropocene This transdisciplinary book will be of particular interest to researchers of degrowth economics sustainable development and urban planning **Research Handbook on the Sociology of Knowledge** Fran Collyer, 2025-07-15 This timely Handbook celebrates and contributes to the recent revitalisation of the sociology of knowledge A diverse group of leading experts from the global North and South provide a state of the art overview of a field which is developing rapidly with the growth of poststructuralist postcolonial and feminist approaches **Speculative endeavors** Selina Foltinek, Karin Hoepker, Katrin Horn, 2025-04-29 Speculative endeavours contributes to an emerging field of scholarship that focuses on alternative forms of knowledge production and speculation in nineteenth century US American society It sheds light on unofficial knowledges such as insider information rumour gossip slander emphasising how knowledges excluded by institutional discourses and authorities form a core part of the developing market economy Ranging from the Early Republic to the Gilded Age contributions analyse entanglements of financial cultural and social capital They focus on social actors who differ from the newly minted ideal of the free white male entrepreneurial individual The speculative endeavours discussed include illicit communications located in slave quarters and domestic spaces communal interventions into a commercialised print market debates on immigrant fiduciary and legal competency and disciplinary techniques of pecuniary pedagogy Taken together they offer unprecedented interdisciplinary insights into an emerging age of capital Embodiment, Political Economy and Human Flourishing Frédéric Basso, Carsten Herrmann-Pillath, 2024-05-11 This book presents embodied economics as a foundational alternative to behavioral economics and other projects integrating economics and psychology inspired by the computational paradigm The 20th century witnessed the disembodiment of economic models through the intensification of mathematization and formal abstraction in economics Even proponents of an embodied approach to cognition such as Hayek paradoxically championed the abstract market order as a disembodied superhuman intelligence In the wake of groundbreaking perspectives in cognitive and social sciences which have helped to rethink the fundamental building blocks of economics agency and institutions this title takes a radical turn towards embodiment Reinstating economics as political economy embodied economics motivates a critique of capitalism based on the analysis of disembodiment through abstraction and reactivates key critical insights into the anthropology put forward by the young Marx about contemporary economics and its conceptualizations of money property and labor Based on this analysis the authors envision a concrete utopia for an economic order centered on human dignity and care for life on Earth This book contributes to recent discussions about behavioral experimental and neuroeconomics and addresses a transdisciplinary audience in the social and behavioral sciences philosophy and the humanities Women Entrepreneurs and Strategic Decision Making in the Global Economy Tomos, Florica, Kumar, Naresh, Clifton, Nick, Hyams-Ssekasi, Denis, 2019-01-11 There has been an increase in women entrepreneurs participating in the growth of

local regional national and global economies While these women showcase crucial skills for strategic leadership and strategy that can advance companies they face cultural educational social and political barriers that impede their development and participation within the global economy Women Entrepreneurs and Strategic Decision Making in the Global Economy is a pivotal reference source that provides vital research on understanding the value of women entrepreneurs and the strategies they can use on the economy and examines gender impact on strategic management and entrepreneurship While highlighting topics such as emotional intelligence global economy and strategic leadership this book is ideally designed for managers entrepreneurs policymakers academicians and students A Translation Theory of Knowledge Transfer Kjell Arne

Røvik,2023-03-28 In A Translation Theory of Knowledge Transfer Kjell Arne Røvik develops a new theory on the challenges of transferring and sharing knowledge across organizational borders Based on extensive research he proposes a new reframing idea of knowledge transfer as acts of translation resembling the translation of texts This new concept both extends and challenges established theories of knowledge transfer Containing a comprehensive review of the last 40 years of research on knowledge transfer across organizational borders this book also offers a step by step account of how a new theory within organizational research has been developed Røvik states that the capacity of an organization to transfer and exploit knowledge from other organizations is a key to its competitiveness progress and even survival and convincingly argues how this new translation theory can be used to guide practitioners involved in knowledge transfer processes *Citizen*

Knowledge Lisa Herzog,2023-09-15 Citizen Knowledge discusses how various forms of knowledge are dealt with in societies that combine a democratic political system with a capitalist economic system How do citizens learn about politics How are scientific insights taken up in politics What role can markets play for processing decentralized knowledge Lisa Herzog argues that the fraught relation between democracy and capitalism gets out of balance if too much knowledge is treated according to the logic of markets Complex societies need different mechanisms for dealing with knowledge among which democratic deliberation and expert communities are central Citizen Knowledge develops the vision of an egalitarian society that considers the use of knowledge in society a matter of shared democratic responsibility **Innovations for Circularity and**

Knowledge Creation Andrea Bernardi,Massimiliano Mazzanti,Salvatore Monni,2024-07-24 Co operatives are increasingly being recognized as important contributors to inclusive sustainable and fair development However the co operative movement faces a multitude of challenges including the lack of access to credit This book presents existing cases and new examples of the intersection between the co operative economy and sustainability challenges Chapters explore innovative circular and low carbon sustainable economy cases and practical examples of the role of co operative organizations within the European Union It asks how policy factors influence sustainability innovations explores the role of workers involvement in firm strategies and analyses the management style of cooperative firms in facing sustainability challenges This book will be an essential resource for scholars and students of sustainability and the circular economy innovation management HRM
