widely used in England for long established semi natural woods shaped by centuries of traditional management Such woods  
are often assumed to provide a direct link with the natural vegetation of England as this existed before the virgin forests  
were fragmented by the arrival of farming This groundbreaking study questions many of these assumptions Drawing on more  
than a decade of research in Norfolk the authors emphasize the essentially unnatural character of ancient woods      Chinese

Mitcheson,Patrick L. Colin,2011-12-10 Reef fish spawning aggregations ranging from small groups to many tens of thousands  
of individuals are spectacular but poorly known natural phenomena whereby fish assemble at specific times and locations to  
spawn For some species these large groups may be the only form of reproduction the high fish numbers briefly giving a false  
impression of stability and abundance an illusion of plenty They are often a focus for intensive seasonal fishing because of  
their predictability and because many important commercial fishes form them Highly vulnerable to overexploitation many  
aggregations and their associated fisheries have disappeared or are in decline Few are effectively managed or incorporated  
into protected areas Aggregations are not well understood by fishery scientists managers and conservationists and their  
significance little appreciated by fishers or the wider public To ensure their persistence to replenish important fisheries in  
coral ecosystems maintain their ecosystem function and continue to delight divers a significant change in perspective is  
needed to foster protection and management This book provides comprehensive and practical coverage of the biology study  
and management of reef fish aggregations exploring their how when where and why It explores ways to better protect study  
manage and conserve them while identifying key data gaps and questions The text is extensively illustrated with many unique  
never before published photographs and graphics Case studies on over 20 interesting and important fishes are included
