*Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production* Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education **English for**

**Visual Writing** Alex Baratta,2010-07-12 Considering the fact that the academic essay continues to be widely used as an assessment tool within education there is a need for students to develop their skills in this area However it is often the case that students perceive instruction in academic writing if it is offered at all as boring This book addresses these two issues First the book can be used by students themselves even in the absence of academic writing classes as a self help guide from which they can develop their knowledge of academic writing and subsequent proficiency Second by discussing the components of academic writing in terms such as film which are familiar to today s generation students are enabled to relate to the material better and see what might have been perceived as dull from a brand new perspective Visual learners in particular will enjoy the analogous link between films and essays and students today are arguably more visually literate than previous generations being exposed to visuals on a daily basis through text message iconography computer games and the Internet The visual instruction provided in turn helps to facilitate mental visuals in students minds from which their knowledge of essay writing can start to develop

**The Automaticity of Everyday Life** Robert S. Wyer, Jr., 2014-02-25 As Skinner argued so pointedly the more we know about the situational causes of psychological phenomena the less need we have for postulating internal conscious mediating processes to explain those phenomena Now as the purview of social psychology is precisely to discover those situational causes of thinking feeling and acting in the real or implied presence of other people it is hard to escape the forecast that as knowledge progresses regarding social psychological phenomena there will be less of a role played by free will or conscious choice in accounting for them In other words because of social psychology s natural focus on the situational determinants of thinking feeling and doing it is inevitable that social psychological phenomena increasingly will be found to be automatic in nature This 10th book in the series addresses automaticity and how it relates to social behavior The lead article written by John Bargh argues that social psychology phenomena are essentially automatic in nature as opposed to being mediated by conscious choice or reflection Bargh maintains that an automatic mental phenomenon is that which occurs reflexively whenever certain triggering conditions are in place when those conditions are present the process runs off autonomously independently of conscious guidance In his lead article he focuses on these preconscious automatic processes that can be contrasted with postconscious and goal dependent forms of automaticity which depend on more than the mere presence of environmental objects or events Because social psychology like automaticity theory and research is also largely concerned with phenomena that occur whenever certain situational features or factors are in place social psychology phenomena are essentially automatic Students and researchers in social and cognitive psychology will find this to be a provocative addition to the series
