

# **Solve Inter-Company Transfer Pricing Challenges Using Oracle Advanced Pricing**

**Peter Belter**

## **Abstract**

This presentation will discuss setups needed in Oracle Advanced Pricing to price intercompany (IC) orders based on the cost of the item and variable markups, dependent on the origin, destination of the transfer and product type.

## **Introduction**

Oracle Advanced Pricing provides a powerful, flexible and extendable engine to derive prices based on business conditions specific to industry and business model of the customer. While many companies take advantage of this tool to tailor their customer prices, few use it to maintain their intercompany margins and manage tax liabilities. It is a little known feature of Advanced Pricing which, with some setups and minimal or no customizations, can be used to maintain cash flow and manage tax liabilities between different businesses under the same corporate umbrella.
